PERSONAL CHARACTERISTICS
(Please describe in some detail)

What is your native language?

English

What other languages do you speak?

None

Math Skills/Ability:

I studied calculus and statistics in College. I'm above average when it comes to everyday mental math.

Mechanical Skills:

My family is very "do it yourself" and I've learned basic car and house repair.

Athletic Skills:

I've played sports consistently from an early age. I only played in community leagues, nothing collegiate.

What is your favorite sport?

My favorite sport currently is cycling.

What are your Hobbies/Interests/Talents:

I like programming, cycling, tennis, and hiking. I also attend comedy shows and sing karaoke.

Describe your artistic ability:

I've taken life drawing classes and learned some art concepts, but I'm not great at it.

Do you like animals? If so, which is your favorite?

Yes. my favorite animal is the giraffe.

To where would you like to travel and why?

I would like to travel to Germany so I can visit family I haven't seen in years.

How would you describe your personality?

I'm introverted and like to have personal time, but when I'm around others I'm funny and always there to help out.

What is your ultimate ambition or goal in life and how do you see yourself in twenty years?

My ultimate goal is to raise a family. In twenty years I see myself with a senior clinical research position and being happily married with 2 children.

Guardian Protector

WHAT IS TEMPERAMENT?

In a world filled with unique individuals, understanding that there are different temperament types can help you make an informed decision about whether this donor is the right match for what you are looking for. Temperament is a configuration of observable personality traits, such as habits of communication, patterns of action, values, and talents. Based off more than 70 years of research, Dr. David Keirsey has identified humankind's four basic temperaments as the Artisan, the Guardian, the Rational, and the Idealist.

This donor's temperament is the Guardian. Guardians make up as much as 40 to 45 percent of the population. This donor's particular temperament type, the Guardian Protector, makes up about 12 to 13 percent of the total population. Protectors often are the hard-working unsung heroes who get the background jobs done that keep things working on an even keel.

WHAT IS THIS DONOR'S TEMPERAMENT?

There are four types of Guardians: Supervisors, Inspectors, Providers, and Protectors. These four personality types share several core characteristics. Firstly, Guardians are dependable, hard-working individuals focused on credentials and traditions.

Guardians tend to be both helpful and dutiful, with a strong work ethic that can take them far. However, grand rewards aren't necessarily very important to Guardians. Instead, they tend to be humble types who are happy to simply receive gratitude for a job well done. Guardians are typically more cautious and deliberate than many people are; this is not a temperament that jumps into any personal or professional situation half-cocked. Indeed, this group can serve as the very cornerstone of society. They tend to be concerned citizens who are willing to join together with others around them because Guardians typically value the camaraderie and security inherent in belonging to groups. As law-abiding individuals who place trust in authority, Guardians will often go out of their way to seek out justice.

All Guardians share the following core characteristics;

- Guardians pride themselves on being dependable, helpful, and hard working.
- Guardians tend to be dutiful, cautious, and humble.
- Guardians are the very cornerstone of society, and tend to focus on credentials and traditions.
- Guardians are concerned citizens who trust authority, join groups, seek security, prize gratitude, and dream of meting out justice.

ABOUT THIS DONOR

This donor is a **Guardian Protector**. Protectors seem to have an extraordinary sense of loyalty and responsibility. In fact, it appears that their fulfillment often depends on the degree to which they can shield others from the world's dangers.

This donor is Apt to:

- feel an obligation to get the work done and do chores no one else wants to do.
- want a sense of belonging and security, for without it, they get anxious and worried.
- have a hard time receiving criticism because it is almost like they have let the other person down.
- be more often seen as supporting others rather than taking the visible lead.
- be dedicated to helping others—family, friends, co-workers, and bosses.
- prefer having some degree of independence and need times of privacy in the workplace.
- take longer than some other types in completing a job because of their need for thoroughness.

Wanting to be of service to others, Protectors can find great satisfaction in assisting the downtrodden. Protectors like this donor may find that they can deal with others' disabilities or neediness better than almost anyone else around them. Although they are very caring, they're not typically one to be outgoing and talkative. As a result, their shyness is sometimes misjudged as stiffness or even as being cold. This perception couldn't be further from the truth. Protectors like this donor are warm-hearted and sympathetic. In fact, they're one who will happily give themselves if they encounter someone in need.

Protectors' reserve really ought to be seen by others as an expression of their sincerity and sense of purpose. The most diligent of all the types, Protectors are often willing to work long, hard hours doing all the thankless jobs that others manage to avoid. They're probably quite happy working alone, regardless of the task. This can be especially true when they're in positions of authority. Protectors like this donor are the kind to try to do everything themselves rather than delegate. Getting a job done right is important to them, but that doesn't mean that they're overly willing to walk over others in the process. They will ordinarily conduct their professional and personal affairs as humanely as possible.

Protectors almost always prefer to rely on time-honored products and procedures rather than spending time speculating or experimenting. As a result, at work they're probably not very happy in situations where the rules are constantly changing or where long-established ways of doing things aren't respected. Tradition is important to them, whether in their work life, their family life, or in their vision of society at large. This donor's type often finds a kind of stability in the social rankings conferred by birth, titles, offices, and credentials.

WHAT IS THIS DONOR **GOOD** AT?

- This donor genuinely cares about the people they work with and their customers.
- This donor enjoys lending support and assistance to others.
- This donor works tirelessly as they sacrificially give themselves to others and their institutions modestly and unassumingly.
- This donor is preserving and wants to ensure that those around them are in good hands, sheltered and protected.
- This donor is meticulous about following procedures.
- This donor is usually very efficient.
- This donor is attuned to people's personal needs and how to accommodate them.

The thriftiest of the sixteen types, Protectors like this donor seem to know the value of a dollar. As a result, they can abhor the squandering or misuse of money. Putting something aside for a rainy day is something near and dear to their heart. In this donor's efforts to be financially stable, there are times when they may overwork themselves to the extreme.

WHAT KIND OF INTELLIGENCE DOES THIS DONOR POSSESS?

The four temperament styles match up consistently with four general types of intelligent roles: Tactical, Logistical, Diplomatic, and Strategic. The four connections between temperament and intelligent roles are as follows:

- Artisan** - Tactical
- Guardian** - Logistical
- Idealist** - Diplomatic
- Rational** - Strategic

An individual's innate type of intelligent role is determined by temperament; however, the degree of skill in that role is determined by practice.

Artisans are best when they can use their tactical skills that enable them to take whatever is available in the moment and make the most of them. They are unusually skilled in being able to react quickly in emergencies. Artisans are most comfortable working in the moment without an excess of constraints or red tape. Tacticians are valuable since they can quickly react to changes in circumstances.

Guardians are at their best when they can use their logistical skills to ensure that the proper equipment is in the proper

place at the proper time. They are most comfortable when following step-by-step procedures and fulfilling their place within the hierarchy. Guardians and their logistical skills are valuable since any person can run into difficulty if supplies are not available when needed or if critical rules are not followed.

Idealists do their best work when they can use their diplomatic skills to communicate with others. They are particularly gifted in helping others perceive how valuable they are and how their gifts can best be applied within a group. With their ability to envision future possibilities for people, they encourage all to learn new skills. They act as the oil that keeps teams working harmoniously and efficiently together.

Rationals use their strategic skills in envisioning and setting long-term goals and milestones for meeting objectives. For Rationals, everything is part of a system. Making things work is a matter of understanding the strategic impact of each part of the system and manipulating them accordingly. The ability to think in the long-term and create new possibilities is particularly valuable when setting goals.

THE GUARDIAN PROTECTOR AS A LEADER

Guardian Protectors like this donor are likely to be quiet and work a great deal behind the scenes picking up other people's messes. They are more likely to give suggestions than commands, but they expect others to understand that they really do want the suggestion followed. If they are not followed, this type of leader loses respect for them, and may give that individual very little attention. Company loyalty and personal loyalty are extremely important to this donor. Protectors value service above self and will do whatever it takes to get the job done.

- Protectors manage in a quiet, caring, rule-oriented manner and believe in loyalty to the organization.

- Protectors have a strong need to meet others' needs, conserve resources, and preserve things and people for future uses.

- Protectors foster a climate of belonging and security and allow for private, quiet time in which to do work.

- Protectors expect employees to follow rules and procedures and respect organizational hierarchies without question.

- Protectors pay close attention to the needs and opinions of employees as long as they support the company's norms.

- Protectors have low tolerance for procrastinators and will not allow under performers to tarnish the image of their work unit.

- Protectors expect employees to quickly follow their suggestions and advice since giving orders can seem harsh.
