

Dear family,

My name is [REDACTED] I was born on [REDACTED] 1985. With my wife we are together more ten years, we are happily married and have two adorable daughters.

The reason to become a donor, is because for me the most important thing is my family. When I open my eyes on the morning to see my daughters and to hug my wife. The sense somebody to wait for you at home after long working day, somebody to jump on your shoulders and pretend that you are a horse :) . To be a parent is such a big pleasure. Is full with important moments: first meeting with your child, first smile, first steps, school time....and many more moments. Yes is not fun at all the time, but that is part of the big adventure to be a parents. This is incredible. That is my reason - to make someone happy like me.

Hope you to have many greatest moments together. To feel the pure parents love.

Yours faithfully

[REDACTED]
