## DONOR PROFILE GENERAL INFORMATION

Year of Birth: 1999

Place of Birth: United States

Racial Group/Color Code:

Caucasian

Black/Black

Asian/Yellow

Other/Red

Ethnic Origin/Ancestry:

Mother: Mexican

Father: German

Do you practice religion? No If so, what religion?

Height: 5ft 10in Weight: 167 lbs Eye Color: Brown Hair Color: Brown

Height at birth: 17 inches Weight at birth: 7 lbs

Adult Shoe Size: 10.5

Hair:

balding

thin

average

thick

Hair Type:

curly

wavy

straight

Corrective Lenses:

Yes

No

Corrective Eye Surgery

Yes

No

Blood Type: O -

Bone Structure:

Small

Medium

Large

Very Large

Are you predominately:

right-handed

left-handed

ambidextrous

Other distinguishing features (dimples, cleft chin, Roman nose, etc.): dimples

Skin Characteristics:

Freckles:

None

Few

Many

Very fair (little to no ability to tan on sun exposure)

Fair (skin will tan lightly on sun exposure)

Medium (light color but will tan moderate to dark)

Olive (pigmentation of unexposed skin)

Light

Moderate

Dark

Dark (unexposed skin)

Light tan

Dark Tan

Brown

Black

Other:

**PERSONAL CHARACTERISTICS**  
(Please describe in some detail)

**What is your native language?**

English

**What other languages do you speak?**

N/A

**Math Skills/Ability:**

I aced most of my math classes in high school and college up to the Calculus level.

**Mechanical Skills:**

I do not have much experience in building mechanical machinery.

**Athletic Skills:**

I played golf throughout high school, and I spend a lot of time lifting weights currently.

**What is your favorite sport?**

I do not watch many sports, but I do love attending live football games.

**What are your Hobbies/Interests/Talents:**

My biggest hobbies are lifting weights, programming, and going on outdoor adventures with my friends.

**Describe your artistic ability:**

I spent many years in high school creating animated short videos using Adobe software. I also used other softwares to edit and film live-action shorts.

**Do you like animals? If so, which is your favorite?**

I love them! My favorite animals are small-medium dogs that enjoy going on hikes as well as just relaxing around the house. Nothing too high-maintenance.

**To where would you like to travel and why?**

My dream is to get a job that will allow me to work and travel anywhere. I want the opportunity to see everywhere, but if I had to pick a place, I would choose Mexico to visit family member that I have never met before.

**How would you describe your personality?**

I would describe myself as light-hearted and funny in social situations; however, I am also a very dedicated, focused worker that likes to get the job done as soon as it is given to me.

**What is your ultimate ambition or goal in life and how do you see yourself in twenty years?**

My ultimate ambition in life is to work as a computer programmer at a large corporation in Seattle. Once I have received enough experience, I plan on leading a startup company with a few close friends that have the same ambitions and focused work ethic as I do to create new products in the technological field.

**ADDITIONAL ACADEMIC INFORMATION**

SAT Scores: Verbal 650 Math 670 Total 1320

LSAT N/A MCAT N/A GRE N/A

GMAT N/A Other N/A N/A

**FERTILITY HISTORY**

Do you have any children? No

If yes, how many male children? N/A female children? N/A

For each child, please give age, and list any health problems:

Age      Special Health Problems

Have you ever been responsible for any pregnancies other than those listed above?       No     Yes

If yes, what year did it occur?

Have you ever been refused as a blood donor?       No     Yes

If yes, explain:

Has anyone in your family had difficulty in achieving pregnancy?       No     Yes

If yes, explain: My mother used special products to boost her ability to achieve a pregnancy because my parents did not begin trying until their were older than their 40s.

Are there any twins or triplets in your family?       No     Yes

If yes describe: I have a twin sister.

## FAMILY MEDICAL HISTORY

**Note:** The following questions require knowledge about your family's medical history. You may wish to have your mother or father assist you in obtaining the necessary information.

Has any member of your family, including yourself, had a problem or defect at birth in any of the following body systems?

- |  |  |                              |
|--|--|------------------------------|
| 1. Circulatory system                        | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 2. Gastrointestinal system                   | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 3. Genital/urinary system                    | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 4. Metabolic (hormones, enzymes, etc.)       | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 5. Nervous system (brain, spinal cord, etc.) | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 6. Respiratory system                        | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 7. Skeletal system (bones, joints, muscles)  | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 8. Organ (heart, lung, kidney, etc.)         | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 9. Other:                                    | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |

If yes to any of the above, please list below the specific defect in each case.

Type of birth defect	Affected family member	Age at diagnosis	Relevant circumstances

Do you have any brothers or sisters who died in infancy or childhood?  No  Yes

If yes, what was the cause?

Are there any diseases or abnormalities that appear to run in your family?  No  Yes  
 If yes, indicate the disease(s) and the family member(s) affected.

Has anyone in your family, including yourself, experienced recurring and/or chronic symptoms that have not been evaluated by a physician? (Please include those symptoms that you may not consider serious.)  No  Yes

If yes, please describe:

D. skin cancer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
E. pigmentation disorders	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
F. other	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Comments: My Maternal Uncle had a heart attack when he was 70 do to overworking in heavy labor jobs. My father and his side of the family all deal with high blood pressure due to their dieting habits. They are all overweight. I had relatively severe asthma as a child, but I outgrew it when I turned 17. My Paternal Grandfather died when he contracted pneumonia during an operation that was supposed

**to fix his leg after he fell. My dad and I both have a little bit of dry skin/ eczema on our hands and legs. My Paternal Grandpa and Grandma contracted early stages of skin cancer on their faces when they turned into their 60s. They went through surgeries and different creams to treat them.**

<b>7. Genital/Reproductive system</b>																			
A. undescended testicle	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
B. hypospadias	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
C. prostate cancer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
D. uterine fibroids	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
E. ovarian cysts	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
F. cancer of cervix or uterus	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
G. breast cancer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
H. ovarian cancer	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
I. Other	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Comments: Mother contracted colon cancer and uterine cancer at age 57, it was treated with surgery by removing a portion of her large intestine. Paternal Grandpa contracted Prostate cancer when he turned 71, it was treated successfully with surgery. Father was born with a disconnected vas deferens; it was never treated. I was conceived by extracting the sperm from my dad's testicles and artificially inseminated into my mother.

Comments: Both grandmothers contracted arthritis past their 70s. Paternal Grandfather contracted gout in his 50s, treated by not eating meat. Father contracted a form of lymphoma (CTCL) when he turned 59. It is not life threatening, symptoms are confined to skin discoloration, and is treated using Electronic Beam Radiation and other therapies.

**PERSONAL HEALTH HISTORY**

Do you currently have any allergies?  No  Yes

If yes, they are to:  Food  Drugs  Plants  Other

Please list specific substances and reaction (s) produced:

Substance	Reaction
Pollen	Dry eyes, sneezing, hard to breathe
Fur from an animal	Sneezing, hard to breathe

Describe any childhood allergies you had: The above allergies mostly affected me as a kid. I grew out of them when I turned 17.

How is your vision (without corrective lenses)?  Excellent  Good  Fair  Poor

Do you wear corrective lenses?  No  Yes Your vision is:

Are you:  Nearsighted  Farsighted  Other (specify)

Have you undergone corrective eye surgery?  No  Yes

Do you have any hearing impairments?  No  Yes  
If yes, please describe:

Condition of your teeth (check one):  Good  Fair  Poor

Your diet is:  Good  Fair  Poor

Any dietary restrictions? No

Dietary supplements (vitamins, etc.)? Multivitamins, Protein Powder, Creatine Monohydrate (Bodybuilding supplements)

How often do you exercise?  Regularly  Occasionally  Rarely

Type of exercise: Lifting weights

Have you ever had surgery?  No  Yes

If yes, please list all surgeries:

- 1) Removed tonsils
- 2)
- 3)
- 4)

Year: 2002  
Year:  
Year:  
Year:

Have you had any hospitalization not already mentioned?  No  Yes

If yes, please explain: I was given an I.V. to help counteract food poisoning on December 2017.

**PERSONAL HEALTH HISTORY**  
(Continued)

Have you had major x-ray exposure or other radiation exposure?  No  Yes

If yes, please explain: I had a C.A.T scan in 2015 when I was worried that I was not focusing as well in school. We soon found out that there was nothing wrong with me.

Have you or your sexual partners ever had:	Myself	Partner	When
NSU (non-specific urethritis)	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Chlamydia	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Genital Warts (HPV)	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Genital Herpes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Other (s) Type (s):	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	

Have you ever been treated for any sexually-transmitted disease(s)?  No  Yes

If yes, for which disease(s): N/A

When? N/A Details? N/A

When was the last time that you were treated? N/A

Have you ever had any major illnesses such as amoebic dysentery, hepatitis, pneumonia, mononucleosis, etc.?  No  Yes

If yes, please explain:

Do you have any chronic medical problems or conditions?  No  Yes

If yes, please explain:

Have you ever been exposed to herbicides or toxic chemicals?  No  Yes

If yes, please explain:

Have you ever served in the military?  No  Yes

If yes, please explain:

**PERSONAL HEALTH HISTORY**  
(Continued)

How many alcoholic drinks do you consume during an average month? 18

Have you ever had a drinking problem?

No  Yes

If yes, describe:

Have you ever been treated for alcohol or drug abuse?

No  Yes

If yes, describe:

Do you smoke cigarettes?

No  Yes

If yes, how many packs/day?

How long have you been smoking regularly?

## **FAMILY HISTORY SECTION**

The following pages contain detailed information regarding the donor's family members. There is one page of information for each family member, including his parents, siblings, grandparents, aunts and uncles. If the donor has more than one sister, you will find more than one page with the title, "Sister of Donor". If the donor has no sisters, this page will be blank. The same applies to brothers, aunts and uncles.

For a summary of the number of family members, please refer to the top portion of page 6 in this profile.

## **In Your Own Words...**

**Which words describe your personality and character?**

Easy going, optimistic, and fun.

**Which sports do you like to participate in?**

I do not like playing many sports other than casual basketball with friends and going to the gym.

**Which sports did you play as a child?**

I played many sports as a kid, including baseball, soccer, basketaball, and track and field. In high school, I switched from playing sports to perfrom as the lead in plays and musicals.

**Which sports do you enjoy watching?**

I do not enjoy watching sports.

**Do you play any musical instruments?**

I played tuba in the high school band.

**What is your most memorable childhood experience?**

My best memories came from performing plays on stage in high school. I loved working with a team to entertain large audiences, and I loved to sing, act, and perform for my peers.

**To which countries have you traveled?**

The only country I have ever been to outside of the U.S. is Canada.

**Describe one of your favorite vacations to another country:**

My best memory in Canada is the time that my fraternity had our Formal Getaway [REDACTED]. This was only a few months after we had all met each other, but after this vacation, we all felt like we were much closer friends.

**Describe a few of your strong sides:**

I believe that my greatest strength is productivity. If I am asked to do a job, I like to get it done right away, so that I do not have to worry about it and I can go on to the next task. When I study, I do not like doing it with other people just so that I can focus better. I believe that the best way to balance a social life and getting work done is through separating the two lifestyles completely. This way, I can give all of my attention to both tasks at hand, whether that be a social event or studying for a test.

**Describe a few of your weak sides:**

One of my weak sides is that I may talk too much. I love being social, but sometimes I do not realize how long I have been telling a joke or if I have been taking the attention away from other people in the room.

## Donor Essay

### **Why do you want to be a donor?**

I want to be a donor because I believe that every family deserves happiness. If they do not have the ability to bring a child into this world, I feel that it is my responsibility to help them achieve this.

### **Describe your relationship with your family. How has your family shaped your values and who you are today?**

My family always allowed me to do and believe in anything that I wanted to accomplish. Although I was raised as a Roman Catholic until I was in the 7<sup>th</sup> grade, my parents were fine with me exploring other religions and even allowed me to stop going to church altogether. When my parents found out that I wanted to study Computer Science [REDACTED], they saved their money to allow me to attend the school. Because my family has been so easy going in my adolescence, I believe that I have grown into a laid back, easy going person myself. My values demonstrate that I am ambivalent when it comes to judging other people, and I am not judgemental in the slightest when it comes to being with other people.

### **What makes you unique?**

One thing that makes me unique is the amount of hobbies that I have had. Throughout my life, I have enjoyed creating Youtube videos (and even getting ad revenue from it), drawing flash animations, weight lifting, and adventuring outdoors. I truly believe that life is too short to not spend it with constant productivity, so I have spent countless hours of my free time conquering many new tasks.

### **What are you most proud of and why?**

I am most proud of my ability to make friends. Being with people gives me energy and my biggest reason to wake up every morning. Every time that I make a new friend or talk to a new person, I am proud of myself and excited for the possibilities that can come with that new friendship.

### Handwritten message

If you could pass on a message to the recipient(s) of your semen, what would that message be?

Thank you for choosing my semen! I wish you the best of luck in raising a child with parts of my genetics, and I am excited for you to soon become a parent. It is easy to see that you are going to do a great job at raising a child considering that you are doing it with the help from Seattle Sperm Bank. Choosing my sperm was the hard part, but now you get to enjoy all the fun that comes with being a parent and I am so happy for you. You got this!

**Name:** Donor #1515

**Temperament:** Rational™  
**Type:** Mastermind (INTJ)

In a world filled with unique individuals, when it comes to personality there are only four different temperaments and sixteen types of people. Understanding these personality types and mastering your own can be the keys to achieving your goals.

Your temperament is the Rational (NT). Rationals are rare, making up no more than 5 to 10 percent of the population. But because of their drive to unlock the secrets of nature and develop new technologies, Rationals have done much to shape the world. Your particular personality type, the Mastermind (INTJ), is even scarcer. Individuals of your type make up little more than 1 to 2 percent of the total population.

This report is designed to help you understand how the needs and preferences of your temperament shape who you are and how you behave. Based on more than 50 years of research by Dr. David W. Keirsey, the Keirsey Temperament Sorter-II has been completed by millions of people worldwide.

Artisan	Guardian	Rational	Idealist
Promoter (ESTP)	Supervisor (ESTJ)	Fieldmarshal (ENTJ)	Teacher (ENFJ)

## About Your Rational Temperament

There are four types of Rationals (NTs): Fieldmarshals, Masterminds, Inventors, and Architects. These four personality types share several core characteristics. Firstly, Rationals are pragmatic people who tend to excel in problem-solving and analytical thinking.

### The Four Types of Rationals Are:

- **Fieldmarshal (ENTJ)**
- **Mastermind (INTJ)**
- **Inventor (ENTP)**
- **Architect (INTP)**

Rationals are ingenious, independent people who can be both strong-willed and skeptical. Typically focused on the world of ideas, Rationals spend much of their time and energy understanding how things work. Known for being strategic leaders and skilled thinkers, Rationals are generally even-tempered, goal-oriented individuals who yearn for achievement and accomplishment. People of this temperament can make both reasonable mates and effective parents. Indeed they can be the kinds of mentors that can help their children gain confidence and independence. Valuing logic and pragmatism above almost all else, Rationals can sometimes seem cold and distant to others. It's not that they don't care about the people around them; it's simply that they're more oriented toward ingenuity and results than toward interpersonal exploration.

### All Rationals share the following core characteristics:

- Rationals tend to be pragmatic, skeptical, self-contained, and focused on problem solving and systems analysis.
- Rationals pride themselves on being ingenious, independent, and strong-willed.
- Rationals make reasonable mates, individualizing parents, and strategic leaders.
- Rationals are even-tempered, trust logic, yearn for achievement, seek knowledge, prize technology, and dream of understanding how the world works.

## An Overview of the Other Three Temperaments

**Artisans** are the temperament with a natural ability to excel in any of the arts -- not only the fine arts such as painting and sculpting, or the performing arts such as music, theater, and dance, but also the athletic, military, political, mechanical, and industrial arts, as well as the "art of the deal" in business.

**Guardians** are the cornerstones of society, for they are the temperament given to serving and preserving our most important social institutions. Guardians have natural talent in managing goods and services -- from supervision to maintenance and supply -- and they use all their skills to keep things running smoothly in their families, communities, schools, churches, hospitals, and businesses.

**Idealists**, as a temperament, are passionately concerned with personal growth and development. Idealists strive to discover who they are and how they can become their best possible self -- always this quest for self-knowledge and self-improvement drives their imagination. They want to help others make the journey as well. Idealists are naturally drawn to working with people, and whether in education or counseling, in social services or personnel work, in journalism or the ministry, they are gifted at helping others find their way in life, often inspiring them to grow as individuals and to fulfill their potentials.

## Being a Mastermind

Not only are Masterminds like you rare, but someone once joked that individuals of your type are scarcely encountered outside of professional settings. They must have been referring to Masterminds' skills as expert thinkers and strategists. Indeed, you can bring a great deal of value to an office, factory, school, or laboratory.

All Rationals are solid planners, but Masterminds are head and shoulders above the rest when it comes to complex operations planning. Your type seems to have an innate ability to grasp a project's necessary progression and understand how each step leads to the next. You can also be first-rate when it comes to anticipating potential difficulties and preparing alternatives. By trying to imagine every contingency, you'll almost never set off on a project without more than one plan in mind. If Plan A fails, you'll move directly along to Plan B.

Although your combination of big picture thinking and detail-oriented skills can make you a highly capable leader, you may not always be eager to take command. Most times you'll prefer to stay in the background until it's been demonstrated that you're the only person who's equal to the task. Once you do agree to take charge, your kind is thoroughly pragmatic. Masterminds understand that efficiency is indispensable in a well-run organization. In fact, if you encounter inefficiency, you can be quick to realign operations and reassign personnel. Whether at work or in your personal life, you're not the type to feel bound by established rules or traditional procedures. Nor are you easily impressed by flashy trends or new buzzwords. The only ideas that you'll adopt in your own life or accept from others are those that truly make sense to you. Sometimes this decisiveness can come off as being a bit harsh, but often you're willing to risk that for the sake of efficiency.

In your career, your hard work and dedication to achieving goals are likely to be rewarded. Masterminds in professional settings often rise to positions of responsibility. Once in such a position, you'll likely continue your goal-oriented ways, sparing neither your own time and effort nor that of your colleagues and employees. As a result, co-workers will likely come to know you as one who is highly effective but also a taskmaster at times. However, this doesn't mean that you're an ogre. Part of being effective means understanding that people work best when they feel good about what they're doing. In most situations you'll verbalize the positive and avoid the negative; you're more interested in moving things forward than dwelling on mistakes of the past.

Problem solving can be highly stimulating to Masterminds. So if there's a puzzle or tangled system that needs sorting out, you'll probably be eager to take it on. Decisions often come easily to you. In fact, at times you may hardly be able to rest until you have things settled and decided. However, even your quicker decisions are often based on some kind of research. You're part of a highly theoretical group, one which often insists on looking at all available data before embracing an idea or plan. You may find yourself suspicious of any statement that is either based on shoddy research or not checked against reality. In addition to these traits, it's interesting to note that Masterminds tend to be much more certain and self-confident than other Rationals. Although you may not think about it often, you likely have a well developed strong will of your own that you put to use regularly.

## Famous Masterminds

Did you know that Sir Isaac Newton and Ayn Rand were both Masterminds too? It's not so surprising when you think about it.

A brilliant scientist and mathematician, Newton not only devised calculus but invented dynamics as well. Like all Masterminds, he was not one to suffer fools gladly.

Author and philosopher Ayn Rand was one of the strongest advocates for reason in modern times. Her renowned literary work *The Fountainhead* is based on rational precepts and her own theory of Objectivism.

## Work and Career

### Your Ideal Work Environment

You are fascinated with developing strategic plans for others to use. In your preferred environment, you work behind the scenes while someone else takes the active leadership role. Often you are driven to step in as leader when you become impatient with the way a project is going.

In your ideal job environment, you independently analyze systems and make recommendations about how objectives will best be reached; someone else does the work of delegating tasks, motivating people, or enforcing work duties. You want challenge in your work and become frustrated when asked to merely follow routines, especially if those routines are inefficient.

Like other Rationals, you are wired to acquire competence and intelligence. As a result, you tend to thrive in intellectually stimulating, innovative work environments where you can be recognized for your expertise.

### At Work with the Four Temperaments

#### At Work with Artisans

Artisans (SPs) are wired to seize freedom and spontaneity. They hunger for the liberty to act on their impulses, to play, and to create. They make up about 30 to 35% of the population.

In business, Artisans are crisis managers and troubleshooters. They can be experts at solving problems and doing what is necessary, whether they are expressly permitted to or not. They are practical, resourceful, flexible, and risk-taking individuals. Co-workers are apt to enjoy their creativity and verbal wit but may perceive Artisans as indecisive or even as troublemakers.

You will likely find that you are comfortable working with most Artisans -- their utilitarian focus on getting things done usually meshes well with your own results-oriented goals and objectives.

### At Work with Guardians

Guardians (SJs) are wired to seek belonging to a group or community. They often stabilize relationships and institutions through their responsible, conventional behavior. They make up about 40 to 45% of the population.

At work, Guardians tend to be administrators and managers. They can be experts at doing what needs to be done in the manner it must be done. They are dependable, accountable, realistic, and service-oriented. Co-workers likely appreciate their desire to belong and contribute but may perceive Guardians as being either slave drivers or sticks-in-the-mud.

When working with Guardians, you will need to keep in mind that they respect rules, hierarchy, and traditions more than you do. Be careful of stepping on their toes in your pursuit of a better way.

### At Work with Idealists

Idealists (NFs) are wired to pursue personal growth, authenticity, and integrity. They can yearn both to develop fully as individuals and to facilitate growth in others. Idealists make up 15 to 20% of the population.

In work environments, Idealists are usually positive, helpful, and people-oriented. They can be experts at dealing with the human resource concerns of an organization, whether these issues are part of their job description or not. Idealists are warm, idealistic, caring individuals. Co-workers are apt to appreciate their authenticity and loyalty to the human side of the business but may perceive Idealists as not being effective enough or even as being flaky.

Idealists are naturally more in tune with the feelings and morale of the team than you are. As you pursue strategic objectives, an Idealist colleague can help you in watching that you don't inadvertently squash other team members in your path.

### At Work with Rationals

Rationals (NTs) are wired to acquire competence and intelligence. Ordinarily they strive to learn, know, predict, and control the resources and ideas in their environment. They make up a little less than 10% of the population.

In the workplace, Rationals are often the researchers and strategists. They can be experts at conceptualizing and seeing the big picture, as well as architecting and implementing the necessary systems. They are logical, precise, independent individuals who usually are responsive to new ideas. Co-workers often appreciate their ingenuity and competence but may perceive Rationals as being impersonal and not good with follow-through.

If you find yourself in a setting where Rationals predominate, usually a technical or scientific environment, make sure that there are resources designated to “dot the I’s” and “cross the T’s” at the completion of a project. Most Rationals are ready to move on as soon as they feel the heavy lifting is done.

### Tips to Help You Find the Right Workplace

- Seek out a place where you can exercise your intellectual freedom.
- Be wary of positions that reward obedience to procedures and policies rather than competence.
- Consider getting formal training, certification, or education that would make you marketable doing what you already know.

Rationals tend to be about as satisfied in their work as their intuitive counterparts the Idealists. About 75% are satisfied in their present jobs. However, in contrast to the Idealists, Rationals seem to base a great deal of their satisfaction on being provided both challenging work and flexible hours. In addition, their satisfaction was driven by perks like company-sponsored beer on Fridays, pets allowed in the workplace, and stock options. Rationals tend to have a wide set of interests. So although they appreciate and even demand a challenge at work, most Rationals also need time to play at their own outside interests.

## Love and Relationships

You're a plan-ahead person who wants to ensure that your life and relationships run smoothly. Establishing a sense of routine helps you to do that. Individuals who are chronically late, slovenly, scattered, or otherwise flaky can turn you off. However, you will sometimes tolerate these qualities if a person is imaginative enough to keep you intrigued. For a romantic partner, you may look for people who are somewhat different than you. As a result, a person who is carefree or gregarious or who easily shows the right emotion at the right time can be very attractive to you. Chances are you enjoy the ways an outgoing or emotionally tuned-in person can engage you and get you out of your shell.

### About You

Other Rationals tend to be more sentimental than you are. While Rationals in general don't tend to like emotional scenes, you are probably the least likely Rational to indulge in one.

In general, you probably do/did not like standard dating games. You are not interested in the myriad social rules involved in negotiating the dating scene. However, because your type is so rare and Rationals tend to be admired, it is likely that others will seek you out to get to know you better.

One difficulty you may have in a relationship is that you want admiration. However, if you have to ask your partner to admire you, that kind of defeats the purpose. Also, you may not even be aware of what it is you feel is lacking. Your partner may feel admiration but simply not be expressing it. You can tell your partner what you admire about them. Most people will reciprocate naturally.

One aspect about you that may cause your partner problems is your lack of emotional output. Most partners want regular emotional affirmation of the relationship. You will probably want to add a habit of regularly praising your mate. It is also important to set up a feedback loop so you will be aware when your partner is especially in need of your attention. Another thing to remember is that while what happens in the real world is of minimal importance to you compared to the world of ideas and systems, your partner is likely to care.

### About Your Partner

#### If Your Partner Is an Artisan

**Rational (NT)/Artisan (SP):** Rational/Artisan pairings are likely to be irreverent and action-packed, as both types are usually equally willing to ignore convention and be focused on results. Rationals can be fascinated by Artisans' aptitude for fun, improvisation, and spontaneity. Artisans are often impressed by Rationals' theoretical approach to problems because it is so different from their own view of things. However, if Artisan mates push their Rationals too hard, the Artisans' fun and games can come to seem frivolous and illogical to Rationals, and the Rationals' more calm, detached ways may clash with Artisans' typical focus on excitement and worldly pleasure. For the relationship to succeed, both must find separate arenas to express themselves: Artisans in their need for excitement and Rationals in their need for intellectual stimulation.

**What Artisans find romantic on a date:** There are two kinds of dates Artisans tend to like: one is an extravagant meal at a place with a fantastic view; another is doing some sort of physical activity, such as a sport, hiking, or a board game that includes some competition and physical contact.

**What Artisans look for when dating:** When Artisans are dating, they tend to look for a calm, practical person to provide them stability. Sexual chemistry is very important as well. Once the relationship becomes established, they want their partner to liven up and quit being so serious.

**What makes Artisans jealous:** Infidelity, such as touching someone else inappropriately, will make them very jealous. Another thing that makes Artisans jealous is if the partner gives gifts to others or makes an extravagant gesture for someone else.

**How Artisans show jealousy:** Artisans are the most likely temperament to react physically, such as throwing the partner's belongings out, etc. If their partner starts cheating, they may cheat too. They may either compete to win their mate back or give their partner the cold shoulder.

**How Artisans like to be romantic:** Artisans like to be romantic with big gestures -- something unexpected and high style. Other ways they are romantic is with teasing and active flirting involving physical contact. They love sensual or exciting times, such as fine dining, gaming, or risky adventures.

**How Artisans show their love:** Artisans show their love with regular physical affection, including kisses, back rubs, and hugs. They also like to give gifts. They give gifts at all times of the year, and the gifts tend to be things that are not necessary but add spice to life. They like to give loved ones nicknames.

**How Artisans like to be loved:** One thing Artisans often appreciate is a surprise, such as leaving for a weekend getaway on a moment's notice. They like to know that their partner has been thinking about them, so gifts (even small ones) at non-traditional times are usually appreciated. They are generally very sensual and enjoy touching games.

### **If Your Partner Is a Guardian**

**Rational (NT)/Guardian (SJ):** Rational/Guardian pairings are often close partnerships focused on stability, reliability, and a satisfying home life. Rationals can enjoy the Guardians' ability to keep things on an even keel and tend to the everyday details of living. Guardians can be impressed by Rationals' intellectual dexterity, future-thinking, and problem-solving tendencies. However, if Guardian mates tire of listening to Rationals' ideas and theories, they may cease to be the stimulant that Rationals desire; and if Rational mates become too wrapped up in their ideas and fail to honor the Guardians' needs for preserving traditions and keeping to some sort of normal standard, the relationship may have difficulties. For the relationship to succeed, both partners need to have a separate arena to demonstrate their best skills that is not encroached on by the other.

**What Guardians find romantic on a date:** Guardians like to be able to see that the other person has planned ahead to make the event special. They usually like to dress up for a formal

event and enjoy traditions, particularly those that have been created together as a couple, such as "their song."

**What Guardians look for when dating:** When Guardians are dating, they tend to look for a person who can provide fun, games, and spontaneity to balance their serious, hard-working nature. They like when their date takes risks on their behalf. After the relationship has become established, they want their partner to settle down and grow up.

**What makes Guardians jealous:** What is most likely to make Guardians jealous is infidelity, especially if it is done publicly so they lose face. Another thing that can make them jealous is a partner who spends what they consider to be an unacceptably large amount of money on someone or something else.

**How Guardians show jealousy:** A Guardian's first response is usually to try to guilt their partner into toeing the line. Other tactics include a constant monitoring of the partner's behavior, tearful pleadings, and loud demands. They may involve others to try to coerce the partner into correct behavior.

**How Guardians like to be romantic:** Guardians typically like traditional romantic gestures, such as flowers, chocolates, lingerie, jewelry, and mild flirting. They are especially likely to keep mementos of times spent with the loved one, such as programs, ticket stubs, and pressed flowers.

**How Guardians show their love:** Guardians show love by taking care of annoying details, planning for the future security of loved ones, organizing things to make them easier to use, and buying gifts. They also often like to give loved ones nicknames. They are the most likely temperament to show love by serving their partner.

**How Guardians like to be loved:** Guardians feel loved when their partner does a task they've been avoiding. They love gifts, but the amount of money spent is very important. It needs to be enough to show that they are valued highly but not so much that they feel resources are being wasted. Guardians feel loved when their partner willingly participates in traditions.

### **If Your Partner Is an Idealist**

**Rational (NT)/Idealist (NF):** Rational/Idealist pairings can be highly satisfying relationships based on exploring the world of ideas. Imagining possibilities -- whether romantic or pragmatic -- and creating dreams for the future can represent the epitome of quality time for this pair. Rationals can be fascinated by Idealists' sensitivity and empathy for others. Idealists can enjoy the intellectual gymnastics of their Rational partners. However, conflicts can occur if either partner's closely held ideals don't match those of the other. When Rationals refuse to participate with Idealists' social needs, or if Idealists denigrate or ignore their Rational partner's need for intellectual stimulation, the relationship deteriorates. For the relationship to succeed, each partner needs stimulation from other people to continue to provide new ideas and foster self-development.

**What Idealists find romantic on a date:** Romantic settings, romantic foods, and romantic things to do are all fun, but they aren't the main attraction for Idealists. Idealists want the total attention of their partner and lots of eye contact. They want reciprocity in sharing.

**What Idealists look for when dating:** Idealists often look for someone who seems stable emotionally. Once the relationship is established, they want their partner to become more sensitive. Idealists view dating as a time to explore the compatibility of each other's views and to see if the lightning bolt hits saying, "This is THE ONE."

**What makes Idealists jealous:** Emotional infidelity makes Idealists jealous. Emotional infidelity can be seen as an emotional withdrawal, or it can be when the partner becomes emotionally attached to another person, idea, or activity.

**How Idealists show jealousy:** The most common way Idealists show jealousy is with pleading and tears. They may beat themselves up and try to be the perfect partner so their mate won't stray. If that doesn't work, they will withdraw emotionally and turn to others.

**How Idealists like to be romantic:** Idealists are generally the most romantic of the temperaments. They attach romantic meaning to all kinds of ordinary events and things. What they find the most romantic is the exploration of each other's souls.

**How Idealists show their love:** Idealists show their love by listening and being a cheerleader for their partner. They will regularly affirm their belief in the other person, their abilities, and their innate goodness. Idealists are likely to write encouraging notes and give affection, such as squeezing hands, kisses, hugs, and back rubs.

**How Idealists like to be loved:** What Idealists want the most is someone to listen to what they have to say and sympathize or empathize without passing judgment or offering advice unless they ask for it. They also feel loved when a partner shares a vulnerability that the partner has, which demonstrates that they have earned trust.

### [If Your Partner Is a Rational](#)

**Rational (NT)/Rational (NT):** Rational/Rational pairings are almost always highly intellectually stimulating couplings. In the best of situations this leads to engaging conversations and mutual exploration. However, problems can occur if each partner becomes too wrapped up in their own world to give adequate time and energy to the other person. If both are Rationals, they are likely to have fairly similar views on romance, showing love, and asking for demonstrations of that love. However, one thing that can cause concerns is if one partner becomes an acknowledged expert. The other partner may fear that the expert will feel that they've outgrown the relationship intellectually. For the relationship to succeed, each partner needs to select arenas in which they can develop a separate expertise and not try to shove that expertise down their partner's throat.

**What Rationals find romantic on a date:** Although some Rationals find a lovely setting and good food to be romantic, what they really desire is a date in which two people spend hours sharing ideas and dreams. Rationals also like a battle of wits and word play, such as double entendres.

**What Rationals look for when dating:** When Rationals are looking for a partner, they are likely to look for one who can encourage and tame their hidden emotional side. After they have settled in a relationship, they are likely to want their partner to develop a thicker skin and be more emotionally stable.

**What makes Rationals jealous:** In general, it is very difficult to provoke a Rational to jealousy. They allow their partners a lot of freedom and expect them to justify that trust. However, if the partner looks for intellectual stimulation from others, that may cause jealousy.

**How Rationals show jealousy:** Rationals are the least likely of the temperaments to show jealousy. They tend to dislike emotional scenes. Often they can deny jealousy and even be unaware of it. Their reaction is usually to withdraw or show distaste for the person's company without explanation.

**How Rationals like to be romantic:** Many people see Rationals as being unromantic. Some Rationals see themselves that way as well. However, most of them have a sometimes deeply hidden sentimental or romantic side. They usually need training to express themselves appropriately.

**How Rationals show their love:** Rationals show love by not holding onto to their partner too tightly. They give their partner lots of freedom to pursue their own ideas and dreams. Another way they show love is by treating their mate as an expert and asking them for advice on something the Rational needs for their latest big idea.

**How Rationals like to be loved:** Rationals love to be seen as experts and approached for advice. They appreciate partners who listen to their ideas and ask intelligent questions. They want partners who can encourage them and their ideas without being condescending. Rationals also like for their partners to be sensitive to their moods and respond accordingly.

**What Each Letter Means**

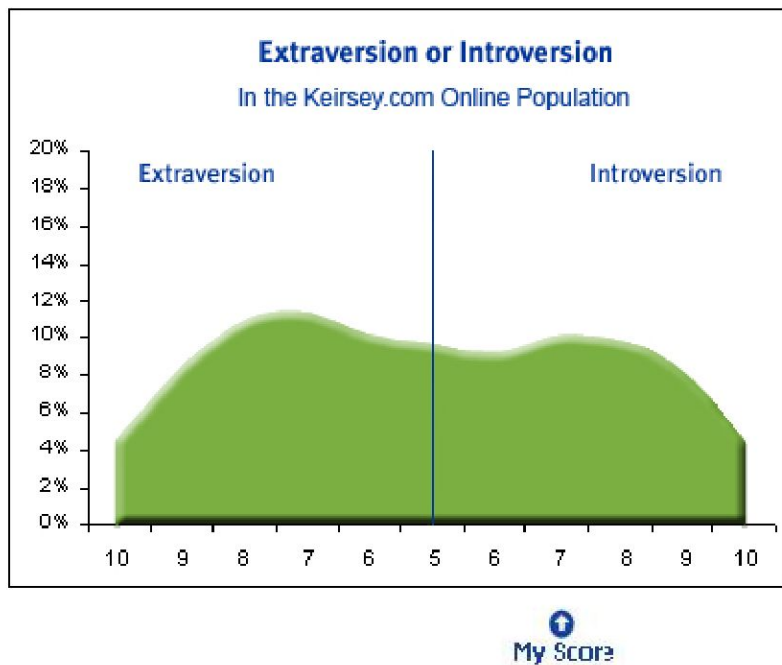

In the Keirsey Temperament Sorter-II, there are four question scales used to detect one's behavioral preferences. The scales are E-I, S-N, T-F, and J-P. No single letter should be taken as naming a "type" of person. For example, you should not label yourself or others as Expressives or E's. Each letter merely suggests stronger or weaker tendencies in a person's overall makeup, and the letters are not factors independent of each other. The pairs of letters indicate the following opposite qualities:

<b>E</b>	<b>Extraverted (Expressive)</b>	<b>I</b>	<b>Introverted (Attentive)</b>
<b>S</b>	<b>Sensing (Observant)</b>	<b>N</b>	<b>Intuitive (Introspective)</b>
<b>T</b>	<b>Thinking (Tough-Minded)</b>	<b>F</b>	<b>Feeling (Friendly)</b>
<b>J</b>	<b>Judging (Scheduled)</b>	<b>P</b>	<b>Perceiving (Probing)</b>

**E/I Scale**

The terms Extraversion (**E**) and Introversion (**I**) describe two vastly different social styles. People who score high in Extraversion on the Temperament Sorter tend to be gregarious and expressive; those scoring high in Introversion tend to be private and reserved.

People strong in Extraversion are typically more comfortable socializing with groups than being alone. They often report that they're energized by contact with other people. These individuals usually have a large circle of friends and are happy to approach others, even strangers, to talk. For people high in Extraversion, social banter is usually an easy and pleasant thing. Interaction is something that makes them feel alive. As a result, too much quiet and seclusion can actually exhaust such people. They tend to report feelings of loneliness or power drain when not in contact with others.

On the other hand, people prone to Introversion often seem more comfortable alone than in a crowd. They tend to draw energy from private, solitary activities, including reading, listening to music, and working by themselves on their latest project or favorite hobby. Introverts usually have a few, long-time friends and can remain in contact with larger groups only so long before their energies are depleted. If their job, family, or social responsibilities require them to be

outgoing or take center stage, they can soon become exhausted and need down time in quiet places to rest and recharge their batteries.

Remember, however, that no one is simply an Extravert or an Introvert. These terms are merely end points on the E-I scale, with most everyone falling somewhere in between. Most individuals embody a mixture of these two social styles. Also, different tasks or roles at work or in the family can bring out more Extraversion or Introversion in a person. This dimension of personality, more than the other three, is fluid and situational.

**S/N Scale**

The **Sensory/Intuitive (S-N)** scale on the Temperament Sorter differentiates between two distinct kinds of human focus. People with high Sensory scores pay more attention to what is going on outside themselves in the world of concrete things; people with high Intuitive scores pay more attention to what is going on inside themselves in the abstract world of ideas.

Sensory people make up the vast majority of the population -- upwards of 75%. These people seem more at home in the material world, where they spend their time looking after the business of everyday living: food and clothing, transportation and shelter, job and family, recreation and social life. With their eye on physical realities, they tend to see all the particulars of what is right in front of them. They typically focus on what's happening in the here and now or what has happened in the past, rather than speculating about future possibilities. These are practical, down-to-earth people who want facts, trust facts, and remember facts. They believe in common sense and usually trust that experience is the best teacher.

In contrast, people who are strongly Intuitive seem more at home in the abstract, conceptual world of ideas. Intuitive types deal in inferences, theories, daydreams, musings, speculations, and symbols -- things that can only be seen with the mind's eye. In fact, because they're so often focused on their internal world, these individuals can sometimes miss a great deal of what's going on around them. For highly Intuitive people, reality is not a solid, present thing, but is more a mental image or a stage of development toward some future ideal. The possible almost always looms large for Intuitive people: whatever "is" can be better. They can be fascinated by hypotheses and potentials. They are also often absorbed by their vivid and complex imaginations. The S-N scale measures the most fundamental of the four dimensions of

personality. It's the first cut, so to speak, in evaluating one's type.

However, this delineation doesn't mean that being Intuitive or Sensory is an either/or proposition. Intuitive individuals certainly turn outward at times and pay attention to the world at large; they're just far more inclined to become preoccupied with their own ideas. So, too, Sensory people do sometimes look inward to ponder and to dream. However, for the most part their flights of imagination lag well behind their real-world observations. Neither type can occupy both worlds at once, and each will usually show a clear preference for one over the other.

**T/F Scale**

The **Thinking/Feeling (T-F)** scale assesses how people govern themselves and make decisions. Everyone has both thoughts and feelings. However, those who score high on Thinking tend to use their heads more when making choices, while those scoring high on Feeling tend to follow their hearts.

People falling on the Thinking end of the scale tend to be more comfortable basing their actions on impersonal, objective factors. Thinking people can be critical and exacting, both with themselves and others. They're often convinced only by hard data and sound reasoning. Individuals who score highly in

Thinking tend to be frank and straightforward. They are the kind of people who are usually willing to speak their minds and stick to their guns, even if it causes conflict with others. They're known for being tough-minded in their decisions, preferring to keep emotions and desires out of the process as much as possible. Thinking types do have powerful feelings, but a strong show of emotion can embarrass them. As a result, they'll usually keep their feelings in check rather than appearing to lose self-control, even at the risk of seeming hard-nosed or cold.

In contrast, people on the Feeling end of the scale are typically more comfortable basing their actions on personal, emotional factors. When considering their course, this type will consult their feelings first and will almost always show concern for others. For the most part, these individuals are sympathetic and sentimental. As a result, they can often be swayed by powerful desire or a touching appeal. Feeling people tend to be softhearted when making decisions. They don't like to hurt anyone's feelings. It's not that Feeling individuals necessarily have more or deeper emotions than those on the Thinking end of the scale. They simply let their feelings show more easily. This tendency makes them seem warmer and friendlier, which in turn can give them an easier time getting along with others.

**J/P Scale**

The **J**udgment/**P**erception (J-P) scale measures how people process information and arrange their lives. Those who score high on Judgment tend to make up their mind quickly and commit to schedules, while those scoring high on Perception prefer to keep their options open and their timetables flexible.

People strong in Judgment waste no time forming opinions or drawing conclusions. They often report feeling a sense of urgency until a decision is made and can rest only after everything is settled. Closure and finality are important to these individuals, as is orderly procedure. As a result, they can be quick to make

schedules, agendas, or timetables for themselves and others to follow. People strong in Judgment will establish deadlines and take them seriously, expecting others will do the same. They're usually comfortable with routines and can be willing to do all sorts of maintenance and cleaning up after a task, feeling that these are necessary steps for a job's completion. For this type, neatness counts. They usually feel unhappy or unsettled when their personal space is a mess. Straightening things up is often near the top of their to-do list.

For their part, people given to Perception keep their eyes open to what's around them, gathering information and looking for opportunities and alternatives that might be available. They usually feel no hurry to nail things down or settle on a finished product. Instead, they tend to prefer exploring possibilities. These individuals are often playful and spontaneous in action. Schedules can make them feel hurried and over-controlled; they tend to look upon deadlines as mere reminders to get on with the job. Also, people high in Perception prefer their work to be enjoyable and meaningful. If a task of routine maintenance or clean up falls to them, they may balk at doing it or leave it to someone else. Easy-going, even somewhat impulsive, these people are usually quite tolerant of mess. Their personal spaces are often cluttered with an assortment of things they've picked up, used, then dropped and forgotten about.

## Frequently Asked Questions

### What Is Temperament?

There are two sides to personality: temperament and character. Temperament is a set of inclinations we are born with, while character is a set of habits we acquire as we grow and mature. Temperament is predisposition, hardwired in from birth; character is disposition, developed over a lifetime. Thus, those of the Artisan temperament are predisposed to impulsive action, those of the Guardian temperament to responsible service, those of the Idealist temperament to personal development, and those of the Rational temperament to objective analysis. Each type of person, unless blocked or deflected by an unfavorable environment, will develop the habits of character appropriate to his or her temperament.

Put another way, our brain is a sort of computer that has temperament for its hardware and character for its software. Our hardware is the physical base of our personality, placing on each of us an unmistakable temperament signature, some facets of which can be observed from a very early age. Our software, on the other hand, is made up of our individual experiences and social environment -- the forces around us that, with time and occasion, give shape to our individual character.

Thus temperament is the inborn form of human nature and character is the emergent form that develops through the interaction of temperament and environment. Personality, your unique personal style, is a combination of the two.

### How Can the Temperament Sorter Help Me?

Fundamentally, the Temperament Sorter helps you to do two things: understand your own temperament and gain insight to other peoples.' Possessing this valuable knowledge of human nature can have a variety of far-reaching effects on your life.

In the work world, being savvy about your temperament can lead you to a clearer understanding of your natural role and functions within an organization. It can also help you better capitalize on your personal strengths to build your success. By comprehending your co-workers' temperaments and how each temperament relates, you can begin to master your interactions with supervisors and staff. In addition, being able to interpret others' innate styles can help you to meet their implicit expectations, as well as increase your own leadership abilities.

In your personal life, being knowledgeable about temperament can help you build strong, lasting ties with others. This is true because it aids you in anticipating your loved ones' needs and respecting their different ways of dealing with life. When you are responsive to others, you will naturally be looked upon as dependable, responsible, helpful, and empathetic. These are all wonderful qualities to bring to your personal relationships. In addition, coming to terms with your own temperament and innate tendencies can bring new levels of wisdom and self-knowledge to all of your interactions, as well as identify how your particular temperament impacts and influences others.
