

I am the only child in the family, and the only boy, so I got a lot of attention, and a very nice childhood. I went to University for my Msc degree in Natural Resources and Waste Management. I like cooking (very good chinese food), music, travelling and sports. I am a little bit buddhist, because it teaches me to be kind and compromise. I am a carer right now. The reason I want to donate is I hope I can help the people who need it, and gain a smile from their faces

Best wishes,
