

## Donor 1511 Pen Sketch

I was very attractive as a child and most of my relatives would come to just have a glimpse of me as they would have heard so much about my looks and silent demeanour, I liked asking a lot of questions and had an inquisitive nature. I loved being with my sister and enjoyed the company of my mother's sisters. I learnt to cycle at very early age, and hence I also learnt to drive a simple motorcycle when I was just 12 yrs old. I used to dream about Europe and visiting Europe at a very early age, which was finally realised at the age of 31.

I was good at football and hockey. I loved playing table tennis. I was not good at some of gymnastics and feared the game of boxing. I was in a boarding school and was away from my parents for good 6 years, although I used to visit them once the term used get over at the end of year, for about 3 months.

I am quite religious and spiritual. I like to believe in Karma and do follow it.

I am very relaxed person to the outside world but a lot is going on inside. I do used to get anxious and nervous if I need to speak to my supervisor or relatives who I thought may judge me. I do not like being judged and hence it made me self conscious and drain my energy in checking my thoughts rather than going with the flow and letting the situation evolve the actions and channelling my thoughts and energy to a more constructive thoughts.

I joined as technical support analyst in the technology field and slowly groomed my self to take up more technical roles and perform a solution architect role in the Data warehousing field in the technology industry. Computers fascinated me and this was the prime reason I took up a role related to computers and never stopped as the technology kept evolving and kept me interested to the core to have really thought about leaving it as a career.

I studied Geography in my secondary school. I loved Chemistry and Biology. I graduated in Mathematics, Statistics and Computer science, as this was the stream which assured good career post graduation in India. Every one seemed to opting for Computer Science and Engineering at that time. I was anyways very good in computers and hence it was the best subject for me. Although I could go on to do Engineering, but due to family situation I couldn't focus much on Engineering and didn't really get into an Engineering. stream, like my father, who was a Bachelor of Engineering in Mechanics from a premium Institute in ████████ India.

I love music, esp. popular Indian. Loved to listen to Madonna, Michael Jackson, Mariah Carey, Celine Dion, followed all the latest hits in Now that's what I call Music.

I am good looking and look less than my age. I most often thought at least 5-6 years younger than my actual biological age. I believe age is just a number and we are what we think we are. My family just adores me and believes I am quite smart and positive character. I see positive side in every situation though. I have a great aesthetic sense and have a good sense of humour and loved dressing smart. I like to be in the company of famous and attractive people. I always yearned to be a celebrity.

To be happy and be with family at all times. To be successful, be loved and have a clear conscious at all times.
