

Pen Sketch (Please write an essay about yourself i.e., describing your childhood, progressing towards your adult life in a few words, including some memorable events if you've had):

My childhood was an interesting one. Being brought up by parents as immigrants had many challenges in terms of language barriers & communication in society. This made it very quickly for me to mature & take responsibility from an early age.

My parents always taught me that hard work gets you far in life. But education more so (this is most likely due to Chinese culture) important. A person must continue to extend his knowledge whenever & wherever he/she goes. From this, after finishing my A-levels I progressed onto obtaining my degree & also my masters (MSc)

Memorable events include traveling back to my parents home town in China & visiting their past/roots & where they were brought up. Very fascinating considering I was brought up in the west.
