DONOR PROFILE GENERAL INFORMATION

Year of Birth: 1993

Place of Birth: USA

Racial Group/Color Code:

Caucasian Black/Black Asian/Yellow Other/Red

Ethnic Origin/Ancestry: Mother: Japanese Father: Scottish/Irish

Religion Born Into:

Donor: Agnostic Mother: Agnostic Father: Christian

If Jewish: Ashkenazi Sephardic Oriental

Height: 6'0" Weight: 150 lbs Eye Color: Brown Hair Color: Black

Hair:

balding
 thin
 average
 thick

Hair Type:

curly
 wavy
 straight

Corrective Lenses:

Yes
 No

Corrective Eye Surgery:

Yes
 No

Blood Type:

Bone Structure: Small Medium Large Very Large

Are you predominately: right-handed left-handed ambidextrous

Other distinguishing features (dimples, cleft chin, Roman nose, etc.): None

Skin Characteristics:

Freckles: None Few Many

Very fair (little to no ability to tan on sun exposure)

Fair (skin will tan lightly on sun exposure)

Medium (light color but will tan moderate to dark)

Olive (pigmentation of unexposed skin)

Dark (unexposed skin)

Light

Moderate

Dark

Light tan

Dark Tan

Brown

Black

EDUCATIONAL BACKGROUND

(check highest level attained)

High School 1 2 3 4 GPA: 4.10

College/University 1 2 3 4 GPA: 3.695 B.A. B.S.

Major Area of Study: Chemistry

Post Graduate 1 2 3 4 5+ GPA: _____

Major: Inorganic Chemistry

Degrees Attained: M.A. M.S. Ph.D. M.D. J.D. D.D.S. Other:

PERSONAL CHARACTERISTICS
(Please describe in some detail)

What is your native language?

English

What other languages do you speak?

None

Math Skills/Ability:

Multivariable Calculus, Differentials, Integration/Derivatives, Matrix Algebra

Mechanical Skills:

Very mechanically inclined, work on cars, motorcycles, and scooters, fix up bicycles

Athletic Skills:

Ran cross country, track & field, sprints and hurdles, cycling

What is your favorite sport?

Cycling and Hiking

What are your Hobbies/Interests/Talents:

Working on cars/bikes/motorcycles, papercrafts, latch hook

Describe your artistic ability:

Proficient. Work on a variety of project, ranging from latch hook to keychains to needlepoint.

What are your favorite foods?

Pasta, anything Mexican, American food, Asian Food. Pretty much any food.

What is your favorite color?

Blue

Do you like animals? If so, which is your favorite?

Yes, Tortoises.

To where would you like to travel and why?

Oregon. Visit family and the small town vibe is great.

How would you describe your personality?

Calm, social but quiet, happy, emotional for good moments

What is your ultimate ambition or goal in life and how do you see yourself in twenty years?

Graduate with my PhD, work in Chemistry, find sidework later in life as a mechanic.

ADDITIONAL ACADEMIC INFORMATION

SAT Scores: Verbal 1200 Math 770 Total 1970

LSAT MCAT 50% GRE 83%

GMAT Other GRE Chemistry 49%

EMPLOYMENT/OCCUPATIONAL HISTORY

What is your current or most recent occupation? Graduate Student

List all the jobs you have had in the past five years and any exposure to chemicals and gases. Please consider carefully.

Jobs/Duties (Do not name employer)	Year employment		Exposure to which chemicals, gases, etc.
	Began	Ended	
1. Graduate Student	2015	Present	Chemistry lab with various organic and inorganic chemicals.
2. Lab Tech	2015	2015	Acetone, Methanol, Ethanol, Isopropanol.
3. Office Clerk	2013	2013	None
4. Civil Engineer	2011	2011	None
5.	Click	Click	
6.	Click	Click	

FERTILITY HISTORY

Do you have any children? None

If yes, how many male children?

female children?

For each child, please give age, and list any health problems:

Age Special Health Problems

Have you ever been responsible for any pregnancies other than those listed above?

No Yes

If yes, what year did it occur?

Have you ever been refused as a blood donor?

No Yes

If yes, explain:

Has anyone in your family had difficulty in achieving pregnancy?

No Yes

If yes, explain:

Are there any twins or triplets in your family?

No Yes

If yes describe:

FAMILY MEDICAL HISTORY

Note: The following questions require knowledge about your family's medical history. You may wish to have your mother or father assist you in obtaining the necessary information.

Has any member of your family, including yourself, had a problem or defect at birth in any of the following body systems?

- | | | |
|--|--|------------------------------|
| 1. Circulatory system | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 2. Gastrointestinal system | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 3. Genital/urinary system | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 4. Metabolic (hormones, enzymes, etc.) | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 5. Nervous system (brain, spinal cord, etc.) | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 6. Respiratory system | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 7. Skeletal system (bones, joints, muscles) | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 8. Organ (heart, lung, kidney, etc.) | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |
| 9. Other: | <input checked="" type="checkbox"/> No | <input type="checkbox"/> Yes |

If yes to any of the above, please list below the specific defect in each case.

Type of birth defect	Affected family member	Age at diagnosis	Relevant circumstances

Do you have any brothers or sisters who died in infancy or childhood? No Yes

If yes, what was the cause?

Are there any diseases or abnormalities that appear to run in your family? No Yes

If yes, indicate the disease(s) and the family member(s) affected.

Has anyone in your family, including yourself, experienced recurring and/or chronic symptoms that have not been evaluated by a physician? (Please include those symptoms that you may not consider serious.)

No Yes

If yes, please describe:

Have you had major x-ray exposure or other radiation exposure? No Yes

If yes, please explain:

Have you or your sexual partners ever had:	Myself	Partner	When
NSU (non-specific urethritis)	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Chlamydia	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Genital Warts (HPV)	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Genital Herpes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	
Other (s) Type (s):	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	<input checked="" type="checkbox"/> No <input type="checkbox"/> Yes	

Have you ever been treated for any sexually-transmitted disease(s)? No Yes

If yes, for which disease(s):

When? Details?

When was the last time that you were treated?

Have you ever had any major illnesses such as amoebic dysentery, hepatitis, pneumonia, mononucleosis, etc.? No Yes

If yes, please explain:

Do you have any chronic medical problems or conditions? No Yes

If yes, please explain:

Have you ever been exposed to herbicides or toxic chemicals? No Yes

If yes, please explain:

Have you ever served in the military? No Yes

If yes, please explain:

PERSONAL HEALTH HISTORY

(Continued)

Please list any medications you are currently taking: None

Please list any prescription, non-prescription or recreational drugs that you have used or are currently using.

Describe any drug use as indicated below.

Name of Drug	Date Started	Date Ended	Frequency of use	How used?

How many alcoholic drinks do you consume during an average week? 1

Have you ever had a drinking problem?

 No Yes

If yes, describe:

Have you ever been treated for alcohol or drug abuse?

 No Yes

If yes, describe:

Do you smoke cigarettes?

 No Yes

If yes, how many packs/day?

How long have you been smoking regularly?

FAMILY HISTORY SECTION

The following pages contain detailed information regarding the donor's family members. There is one page of information for each family member, including his parents, siblings, grandparents, aunts and uncles. If the donor has more than one sister, you will find more than one page with the title, "Sister of Donor". If the donor has no sisters, this page will be blank. The same applies to brothers, aunts and uncles.

For a summary of the number of family members, please refer to the top portion of page 6 in this profile.

In Your Own Words...

What did you do immediately after high school?

I went to _____ for college to get my bachelor's degree in Chemistry.

Which words describe your personality and character?

I am a compassionate person who enjoys smiling, laughing, and having a good time. I am very honest and have a good morale. I also have a nice group of friends I like to keep in touch with.

Which sports do you like to participate in?

Currently, I enjoy hiking and cycling. I also have an interest in walking.

Which sports did you play as a child?

I tried a variety of sports, like soccer, basketball, baseball, etc. As I grew older, I played racketball and tennis. In high school, I ran cross country and did hurdles and sprints in track.

Which sports do you enjoy watching?

None. I don't watch sports.

Do you play any musical instruments?

No. I did do vocals in 6th grade, but no instruments.

What is your most memorable childhood experience?

I would spend all day with a friend during the summer testing out my waterproof camera at the pool. We would take various photos and enjoy the hot days.

To which countries have you traveled?

I have been to Mexico for a day trip, and Taiwan for a couple weeks for a wedding.

Describe one of your favorite vacations to another country:

The trip to Taiwan was pretty epic. I went around Christmas time, and the decorations were marvelous. We took a bus tour around the island as well.

Describe things you like the most about your own country:

I enjoy finding local hiking spots and spending time outdoors. I also like cities that have good bike trails for cycling.

Describe a few of your strong sides:

I am very good at fixing things and comforting those who are sad. I am a good shoulder to cry on.

Describe a few of your weak sides:

I am very blunt and that can get me into trouble sometimes. I am also a bit emotional.

Donor Essay

Why do you want to be a donor?

I wanted to help out those who are in need. It was never for the money, but for the families who needed the help.

Describe your relationship with your family. How has your family shaped your values and who you are today?

My family has always been supportive and encouraging. Ever since I moved for grad school, my family has been even more helpful and we talk a lot.

What makes you unique?

I have a very sensitive side that most people don't get to see.

What are you most proud of and why?

I am most proud of the relationship I have with my fiance. We are very happy together and support each other well in grad school.

Temperament: Guardian™

Type: Inspector (ISTJ)

In a world filled with unique individuals, when it comes to personality there are only four different temperaments and sixteen types of people. Understanding these personality types and mastering your own can be the keys to achieving your goals.

Your temperament is the Guardian (SJ). You have a lot of company out there, as Guardians make up as much as 40 to 45 percent of the population. This is a good thing, because Guardians usually end up doing all the indispensable but thankless jobs the rest of the world takes for granted. Your particular personality type, the Inspector (ISTJ), makes up just about 10 to 11 percent of the total population.

This report is designed to help you understand how the needs and preferences of your temperament shape who you are and how you behave. Based on more than 50 years of research by Dr. David W. Keirsey, the Keirsey Temperament Sorter-II has been completed by millions of people worldwide.

Artisan	Guardian	Rational	Idealist
Promoter (ESTP)	Supervisor (ESTJ)	Fieldmarshal (ENTJ)	Teacher (ENFJ)
Crafter (ISTP)	Inspector (ISTJ)	Mastermind (INTJ)	Counselor (INFJ)
Performer (ESFP)	Provider (EFTJ)	Inventor (ENTP)	Champion (ENFP)
Composer (ISFP)	Protector (ISFJ)	Architect (INTP)	Healer (INFP)

FAQs

About Your Guardian Temperament

There are four types of Guardians (SJs): Supervisors, Inspectors, Providers, and Protectors. These four personality types share several core characteristics. Firstly, Guardians are dependable, hard-working individuals focused on credentials and traditions.

Guardians tend to be both helpful and dutiful, with a strong work ethic that can take them far. However, grand rewards aren't necessarily very important to Guardians. Instead, they tend to be humble types who are happy to simply receive gratitude for a job well done. Guardians are typically more cautious and deliberate than many people are; this is not a temperament that jumps into any personal or professional situation half-cocked. Their grounded approach to life can make Guardians loyal mates, responsible parents, and stabilizing leaders. Indeed, this group can serve as the very cornerstone of society. They tend to be concerned citizens who are willing to join together with others around them. Perhaps this is because Guardians typically value the camaraderie and security inherent in belonging to groups. As law-abiding individuals who place trust in authority, Guardians will often go out of their way to seek out justice.

The Four Types of Guardians Are:

- Supervisor (ESTJ)
- Inspector (ISTJ)
- Provider (ESFJ)
- Protector (ISFJ)

All Guardians share the following core characteristics:

- Guardians pride themselves on being dependable, helpful, and hard working.
- Guardians make loyal mates, responsible parents, and stabilizing leaders.
- Guardians tend to be dutiful, cautious, humble, and focused on credentials and traditions.
- Guardians are concerned citizens who trust authority, join groups, seek security, prize gratitude, and dream of meting out justice.

An Overview of the Other Three Temperaments

Artisans are the temperament with a natural ability to excel in any of the arts -- not only the fine arts such as painting and sculpting, or the performing arts such as music, theater, and dance, but also the athletic, military, political, mechanical, and industrial arts, as well as the "art of the deal" in business.

Idealists, as a temperament, are passionately concerned with personal growth and development. Idealists strive to discover who they are and how they can become their best possible self -- always this quest for self-knowledge and self-improvement drives their imagination. They want to help others make the journey as well. Idealists are naturally drawn to working with people, and whether in education or counseling, in social services or personnel work, in journalism or the ministry, they are gifted at helping others find their way in life, often inspiring them to grow as individuals and to fulfill their potentials.

Rationals are the problem solving temperament, particularly if the problem has to do with the many complex systems that make up the world around us. Rationals might tackle problems in organic systems such as plants and animals, in mechanical systems such as railroads and computers, or in social systems such as families, companies and governments. Whatever systems fire their curiosity, Rationals will analyze them to understand how they work, so they can then figure out how to make them work better.

Being an Inspector

The one word that best describes Inspectors like you is dependable. Whether at home or at work, your type can be extraordinarily persevering and dutiful, particularly when it comes to keeping an eye on the people and projects for which you're responsible.

Keeping within your own quiet way, you're the kind of person who will see that rules are followed, laws respected, and standards upheld. Inspectors are the true guardians of institutions. As a result, in professional settings you're one to be patient with your work and with any procedures you're expected to follow. People who aren't willing to behave accordingly tend to rub you the wrong way. Responsible to the core, you like it when people know their duties, follow guidelines, and operate within the rules. Because of these beliefs and your hard-working nature, you can be the perfect person to examine the quality of products and services, monitor schedules, and oversee resources. If only everyone were as dependable as you are.

Because you can be hard-nosed about rules, others may not always look favorably on you. In fact, you may earn a reputation for being cold or unfeeling. People who feel this way about you misjudge your character and fail to see your good intentions. This is too bad, since your vulnerability means that you may take others' criticisms to heart. Sometimes your good work may also go unrecognized because you're not one to trumpet your accomplishments as they happen.

Inspectors can be highly sociable people. As a member of this type you're likely to be both talkative and involved. Liking to stay connected, you may spend your free time with community service organizations, especially ones focused on traditional values. Perhaps you've volunteered with your nearby Sunday school, Little League team, Boy or Girl Scouts, or other local clubs now or in the past.

Like all Guardians, Inspectors hold family social ceremonies dear. Weddings, birthdays, and anniversaries can be really important to you. However, that doesn't mean that you need a lot of public fanfare at these times. You'll usually prefer to keep such occasions intimate and may become shy if celebrations become too large.

Generally speaking, Inspectors like you are not comfortable with anything that gets too fancy. When speaking you usually will be plain and down-to-earth. Your clothes will tend toward the functional rather than the flashy. As for your personal space, you strive to keep your home and work environments neat, orderly, and comfortably traditional. Regardless of the product type, you don't really trust newfangled gadgets. Instead, you'll stick with the tried-and-true option almost every time.

Famous Inspectors

Did you know that President Harry Truman and Queen Elizabeth II are both Inspectors too? It's not so surprising when you think about it.

President Truman is known for making tough decisions with no regret, as he did with the atom bomb. He was also known for his extraordinary sense of responsibility, perhaps expressed best in his own words: "the buck stops here."

As the reigning monarch of Great Britain, Queen Elizabeth II is an Inspector through and through as well. As Inspectors will, she performs her royal duties without complaint, maintaining a grounded, no-nonsense style. She is a living embodiment of hierarchy and tradition.

Work and Career

Your Ideal Work Environment

You are most comfortable when your life is structured. As a result, you usually prefer a workplace that lets you create a routine you can settle into.

Although you like time alone, you are most at ease working with others. This is particularly true when work standards and others' behavior are predictable. Work environments where people do their own thing strike you as sloppy or even dangerous. Unlike many people, you appreciate having corporate policies and hierarchies to adhere to. They give you a sense of order and clarity that can enhance your job satisfaction.

Like other Guardians, you are wired to seek belonging within a group or community. As a result, in the workplace you'll typically make attempts to stabilize both relationships and institutions through responsible, conventional behavior. You thrive as a conservator who establishes, nurtures, and maintains traditional social and business structures.

At Work with the Four Temperaments

At Work with Artisans

Artisans (SPs) are wired to seize freedom and spontaneity. They hunger for the liberty to act on their impulses, to play, and to create. They make up about 30 to 35% of the population.

In business, Artisans are crisis managers and troubleshooters. They can be experts at solving problems and doing what is necessary, whether they are expressly permitted to or not. They are practical, resourceful, flexible, and risk-taking individuals. Co-workers are apt to enjoy their creativity and verbal wit but may perceive Artisans as indecisive or even as troublemakers.

You may find that you are frustrated working with many Artisans, as their focus on getting things done often leads them to disregard rules, procedures, and hierarchies that you know are important in maintaining structure and order within the organization. However, you often appreciate their keen sense of reality and tactical maneuvering abilities.

At Work with Guardians

Guardians (SJs) are wired to seek belonging to a group or community. They often stabilize relationships and institutions through their responsible, conventional behavior. They make up about 40 to 45% of the population.

At work, Guardians tend to be administrators and managers. They can be experts at doing what needs to be done in the manner it must be done. They are dependable, accountable, realistic, and service-oriented. Co-workers likely appreciate their desire to belong and contribute but may perceive Guardians as being either slave drivers or sticks-in-the-mud.

If you are part of a group that is predominantly Guardians, occasionally invite people of the other temperaments in to stir the pot. Guardians' tendency to stick to the tried-and-true and need for stability may cause your team to miss opportunities available by stepping out of the box.

At Work with Idealists

Idealists (NFs) are wired to pursue personal growth, authenticity, and integrity. They can yearn both to develop fully as individuals and to facilitate growth in others. Idealists make up 15 to 20% of the population.

In work environments, Idealists are usually positive, helpful, and people-oriented. They can be experts at dealing with the human resource concerns of an organization, whether these issues are part of their job description or not. Idealists are warm, idealistic, caring individuals. Co-workers are apt to appreciate their authenticity and loyalty to the human side of the business but may perceive Idealists as not being effective enough or even as being flaky.

Idealists are naturally more in tune with the feelings and morale of the team than you are. As you pursue organizational objectives, an Idealist colleague can help you in watching that you don't inadvertently squash other team members in your path.

At Work with Rationals

Rationals (NTs) are wired to acquire competence and intelligence. Ordinarily they strive to learn, know, predict, and control the resources and ideas in their environment. They make up a little less than 10% of the population.

In the workplace, Rationals are often the researchers and strategists. They can be experts at conceptualizing and seeing the big picture, as well as architecting and implementing the necessary systems. They are logical, precise, independent individuals who usually are responsive to new ideas. Co-workers often appreciate their ingenuity and competence but may perceive Rationals as being impersonal and not good with follow-through.

You may find that Rationals can seem somewhat arrogant to you as co-workers. Like the Artisans, they have little regard for most rules and procedures, discarding either whenever they find something they see as working better. They also tend to disregard seniority and authority, focusing only on whether or not (they believe) a person is competent. However, you can take advantage of their ability to think outside the box and usually appreciate their strategic insights when not offered in an arrogant manner.

Tips to Help You Find the Right Workplace

- Seek out a relatively structured environment where people work well together.
- Look for environments where there's enough of a sense of order that you feel comfortable, supported, and productive.
- Don't let your need for comfort and security stand between you and opportunities to learn new skills, contribute in ways you may not have imagined, or take advantage of positive changes in your company or field.

When it comes to your work life, you're part of a pretty satisfied bunch. Overall, Guardians seemed to be as satisfied in their jobs as both the Idealists and Rationals. About 75% of Guardians identify themselves as being happy in their current positions. Challenging work and altruistic service seemed to be the factors that created the most job satisfaction for Guardians. Perks like being allowed to bring pets to work or have company-sponsored beer on Fridays held much less importance. Guardians are types who enjoy being of service, so feeling challenged and providing service to the employer really are top priorities, especially if that employer provides altruistic services to the community at large.

Love and Relationships

Getting into relationships is harder for many Inspectors than keeping them going. In fact, you may sometimes feel out of the loop in the modern dating game. Typically you're more reserved in social situations than many other people are.

You can be somewhat old-fashioned in your dating values and practices. In addition, because you are usually so focused on your work and other commitments, you may fall into the habit of putting your personal life last. If this is true for you and you're single, you might have a hard time gaining momentum; if partnered, your mate may sometimes complain that you don't put enough energy into keeping the spark alive. For a romantic partner, you may look for people who are somewhat different than you. As a result, outgoing people who seem to go with the flow can be very attractive to you. During the early stages of relationships, the differences between you and your mate are likely to be especially endearing and fun.

About You

You are among the most likely to show love through long-range planning to keep your loved ones comfortable and happy. Although you enjoy gifts, other Guardians are likely to attach more importance to them. Inspectors tend to be practical and logical even in love.

When dating, you are likely to have clear objectives. You know what you want and then proceed steadily towards that goal. You are among the least likely types to date simply for social stimulation.

One difficulty you may have in a relationship is that it can be hard for you to truly view differences as good. Even if you intellectually know that society needs different kinds of people, you are likely to want conformity at home. Studying about personalities and human differences can help you overcome this hurdle. One thing about you that can make life easier for your partner is that you don't demand constant proof of love. You expect the commitment on their part to be the same as yours.

One aspect about you that may cause your partner problems is that they may wonder if you still love them. Most other types need regular reaffirmation of their partner's love, caring, and enjoyment of them. You are probably good at remembering anniversaries, birthdays, and the like, but your partner may need more. You can plan to celebrate smaller anniversaries, such as so many months/years since your first kiss, since buying a house together, or other important events in your lives as a couple.

About Your Partner

If Your Partner Is an Artisan

Guardian (S)/Artisan (SP): Guardian/Artisan pairings are complementary relationships where the partners' natural tendencies can balance one another nicely. For Guardians, an impetuous Artisan can sometimes seem like a child to rear and at other times like a wonderful diversion from their own nose-to-the-grindstone existence. For Artisans, a responsible, concerned Guardian can seem like a real Rock of Gibraltar to ground themselves to and a person who

relieves them of some of the tedious chores of life. However, these couples don't always see eye to eye on money matters, with Guardians desiring practicality and savings for the future and Artisans wanting the excitement of a grand gesture. For the relationship to succeed it is necessary that they retain tolerance and goodwill on both sides and appreciate the skills each brings to the pairing.

What Artisans find romantic on a date: There are two kinds of dates Artisans tend to like: one is an extravagant meal at a place with a fantastic view; another is doing some sort of physical activity, such as a sport, hiking, or a board game that includes some competition and physical contact.

What Artisans look for when dating: When Artisans are dating, they tend to look for a calm, practical person to provide them stability. Sexual chemistry is very important as well. Once the relationship becomes established, they want their partner to liven up and quit being so serious.

What makes Artisans jealous: Infidelity, such as touching someone else inappropriately, will make them very jealous. Another thing that makes Artisans jealous is if the partner gives gifts to others or makes an extravagant gesture for someone else.

How Artisans show jealousy: Artisans are the most likely temperament to react physically, such as throwing the partner's belongings out, etc. If their partner starts cheating, they may cheat too. They may either compete to win their mate back or give their partner the cold shoulder.

How Artisans like to be romantic: Artisans like to be romantic with big gestures -- something unexpected and high style. Other ways they are romantic is with teasing and active flirting involving physical contact. They love sensual or exciting times, such as fine dining, gaming, or risky adventures.

How Artisans show their love: Artisans show their love with regular physical affection, including kisses, back rubs, and hugs. They also like to give gifts. They give gifts at all times of the year, and the gifts tend to be things that are not necessary but add spice to life. They like to give loved ones nicknames.

How Artisans like to be loved: One thing Artisans often appreciate is a surprise, such as leaving for a weekend getaway on a moment's notice. They like to know that their partner has been thinking about them, so gifts (even small ones) at non-traditional times are usually appreciated. They are generally very sensual and enjoy touching games.

If Your Partner Is a Guardian

Guardian (SJ)/Guardian (SJ): Guardian/Guardian pairings can be traditional, predictable couplings founded on a devotion to home and family and an industrious work ethic. Their relationship can be mutually satisfying as each partner sacrifices on behalf of the other and the family as a whole. These partners can get along especially well because both tend to believe in similar values like thrift and civic responsibility. However, problems may arise at times when each mate tries to run the relationship or household according to their own personal system. The ensuing arguments and struggle for control can cause great rifts. For the relationship to

succeed, the partners must come to agreement about the areas in which each is in charge and then defer to the other's wishes. When agreement cannot be made, they need to find some way to divide the territory.

What Guardians find romantic on a date: Guardians like to be able to see that the other person has planned ahead to make the event special. They usually like to dress up for a formal event and enjoy traditions, particularly those that have been created together as a couple, such as "their song."

What Guardians look for when dating: When Guardians are dating, they tend to look for a person who can provide fun, games, and spontaneity to balance their serious, hard-working nature. They like when their date takes risks on their behalf. After the relationship has become established, they want their partner to settle down and grow up.

What makes Guardians jealous: What is most likely to make Guardians jealous is infidelity, especially if it is done publicly so they lose face. Another thing that can make them jealous is a partner who spends what they consider to be an unacceptably large amount of money on someone or something else.

How Guardians show jealousy: A Guardian's first response is usually to try to guilt their partner into toeing the line. Other tactics include a constant monitoring of the partner's behavior, tearful pleadings, and loud demands. They may involve others to try to coerce the partner into correct behavior.

How Guardians like to be romantic: Guardians typically like traditional romantic gestures, such as flowers, chocolates, lingerie, jewelry, and mild flirting. They are especially likely to keep mementos of times spent with the loved one, such as programs, ticket stubs, and pressed flowers.

How Guardians show their love: Guardians show love by taking care of annoying details, planning for the future security of loved ones, organizing things to make them easier to use, and buying gifts. They also often like to give loved ones nicknames. They are the most likely temperament to show love by serving their partner.

How Guardians like to be loved: Guardians feel loved when their partner does a task they've been avoiding. They love gifts, but the amount of money spent is very important. It needs to be enough to show that they are valued highly but not so much that they feel resources are being wasted. Guardians feel loved when their partner willingly participates in traditions.

If Your Partner Is an Idealist

Guardian (SJ)/Idealist (NF): Guardian/Idealist pairings can be true-blue partnerships focused on comfort, stability, and mutual dependability. Because Guardians and Idealists are usually law-abiding types who believe in following the rules, they can make a good match. Guardians may appreciate Idealists' sensitivity for others and their deep interest in their partner's success. Idealists can appreciate Guardians' practicality and ability to deal with day-to-day matters that may interrupt the Idealists' dreams for the future. Problems may arise at times because Idealists' morals and values tend to have a wider range than their Guardian mates.' For the

relationship to succeed, both will need to understand the differences in how each shows caring for the other and appreciate those efforts.

What Idealists find romantic on a date: Romantic settings, romantic foods, and romantic things to do are all fun, but they aren't the main attraction for Idealists. Idealists want the total attention of their partner and lots of eye contact. They want reciprocity in sharing.

What Idealists look for when dating: Idealists often look for someone who seems stable emotionally. Once the relationship is established, they want their partner to become more sensitive. Idealists view dating as a time to explore the compatibility of each other's views and to see if the lightning bolt hits saying, "This is THE ONE."

What makes Idealists jealous: Emotional infidelity makes Idealists jealous. Emotional infidelity can be seen as an emotional withdrawal, or it can be when the partner becomes emotionally attached to another person, idea, or activity.

How Idealists show jealousy: The most common way Idealists show jealousy is with pleading and tears. They may beat themselves up and try to be the perfect partner so their mate won't stray. If that doesn't work, they will withdraw emotionally and turn to others.

How Idealists like to be romantic: Idealists are generally the most romantic of the temperaments. They attach romantic meaning to all kinds of ordinary events and things. What they find the most romantic is the exploration of each other's souls.

How Idealists show their love: Idealists show their love by listening and being a cheerleader for their partner. They will regularly affirm their belief in the other person, their abilities, and their innate goodness. Idealists are likely to write encouraging notes and give affection, such as squeezing hands, kisses, hugs, and back rubs.

How Idealists like to be loved: What Idealists want the most is someone to listen to what they have to say and sympathize or empathize without passing judgment or offering advice unless they ask for it. They also feel loved when a partner shares a vulnerability that the partner has, which demonstrates that they have earned trust.

If Your Partner Is a Rational

Guardian (SI)/Rational (NT): Guardian/Rational pairings are often close relationships focused on stability, reliability, and a sense of duty. Because Rationals are often wrapped up in their ideas, Guardian mates typically see to the everyday workings of family life. Guardians appreciate Rationals' deep thinking and logic, while Rationals appreciate their mate's stability and self-sacrifice. Problems may arise at times if Guardians feel left out of their Rational mates' emotional lives or under-appreciated for their efforts in household matters. For the relationship to succeed, both partners need to have a separate arena to demonstrate their best skills that is not encroached on by the other.

What Rationals find romantic on a date: Although some Rationals find a lovely setting and good food to be romantic, what they really desire is a date in which two people spend hours sharing ideas and dreams. Rationals also like a battle of wits and word play, such as double entendres.

What Rationals look for when dating: When Rationals are looking for a partner, they are likely to look for one who can encourage and tame their hidden emotional side. After they have settled in a relationship, they are likely to want their partner to develop a thicker skin and be more emotionally stable.

What makes Rationals jealous: In general, it is very difficult to provoke a Rational to jealousy. They allow their partners a lot of freedom and expect them to justify that trust. However, if the partner looks for intellectual stimulation from others, that may cause jealousy.

How Rationals show jealousy: Rationals are the least likely of the temperaments to show jealousy. They tend to dislike emotional scenes. Often they can deny jealousy and even be unaware of it. Their reaction is usually to withdraw or show distaste for the person's company without explanation.

How Rationals like to be romantic: Many people see Rationals as being unromantic. Some Rationals see themselves that way as well. However, most of them have a sometimes deeply hidden sentimental or romantic side. They usually need training to express themselves appropriately.

How Rationals show their love: Rationals show love by not holding onto to their partner too tightly. They give their partner lots of freedom to pursue their own ideas and dreams. Another way they show love is by treating their mate as an expert and asking them for advice on something the Rational needs for their latest big idea.

How Rationals like to be loved: Rationals love to be seen as experts and approached for advice. They appreciate partners who listen to their ideas and ask intelligent questions. They want partners who can encourage them and their ideas without being condescending. Rationals also like for their partners to be sensitive to their moods and respond accordingly.

What Each Letter Means

In the Keirsey Temperament Sorter-II, there are four question scales used to detect one's behavioral preferences. The scales are E-I, S-N, T-F, and J-P. No single letter should be taken as naming a "type" of person. For example, you should not label yourself or others as Expressives or E's. Each letter merely suggests stronger or weaker tendencies in a person's overall makeup, and the letters are not factors independent of each other. The pairs of letters indicate the following opposite qualities:

E	Extraverted (Expressive)	I	Introverted (Attentive)
S	Sensing (Observant)	N	Intuitive (Introspective)
T	Thinking (Tough-Minded)	F	Feeling (Friendly)
J	Judging (Scheduled)	P	Perceiving (Probing)

E/I Scale

The terms **Extraversion (E)** and **Introversion (I)** describe two vastly different social styles. People who score high in Extraversion on the Temperament Sorter tend to be gregarious and expressive; those scoring high in Introversion tend to be private and reserved.

People strong in Extraversion are typically more comfortable socializing with groups than being alone. They often report that they're energized by contact with other people. These individuals usually have a large circle of friends and are happy to approach others, even strangers, to talk. For people high in Extraversion, social banter is usually an easy and pleasant thing. Interaction is something that makes them feel alive. As a result, too much quiet and seclusion can actually exhaust such people. They tend to report feelings of loneliness or power drain when not in contact with others.

My Scores

On the other hand, people prone to Introversion often seem more comfortable alone than in a crowd. They tend to draw energy from private, solitary activities, including reading, listening to music, and working by themselves on their latest project or favorite hobby. Introverts usually have a few, long-time friends and can remain in contact with larger groups only so long before their energies are depleted. If their job, family, or social responsibilities require them to be

outgoing or take center stage, they can soon become exhausted and need down time in quiet places to rest and recharge their batteries.

Remember, however, that no one is simply an Extrovert or an Introvert. These terms are merely end points on the E-I scale, with most everyone falling somewhere in between. Most individuals embody a mixture of these two social styles. Also, different tasks or roles at work or in the family can bring out more Extraversion or Introversion in a person. This dimension of personality, more than the other three, is fluid and situational.

S/N Scale

The **Sensory/Intuitive (S-N)** scale on the Temperament Sorter differentiates between two distinct kinds of human focus. People with high Sensory scores pay more attention to what is going on outside themselves in the world of concrete things; people with high Intuitive scores pay more attention to what is going on inside themselves in the abstract world of ideas.

Sensory people make up the vast majority of the population -- upwards of 75%. These people seem more at home in the material world, where they spend their time looking after the business of everyday living: food and clothing, transportation and shelter, job and family, recreation and social life. With their eye on physical realities, they tend to see all the particulars of what is right in front of them. They typically focus on what's happening in the here and now or what has happened in the past, rather than speculating about future possibilities. These are practical, down-to-earth people who want facts, trust facts, and remember facts. They believe in common sense and usually trust that experience is the best teacher.

In contrast, people who are strongly Intuitive seem more at home in the abstract, conceptual world of ideas. Intuitive types deal in inferences, theories, daydreams, musings, speculations, and symbols -- things that can only be seen with the mind's eye. In fact, because they're so often focused on their internal world, these individuals can sometimes miss a great deal of what's going on around them. For highly Intuitive people, reality is not a solid, present thing, but is more a mental image or a stage of development toward some future ideal. The possible almost always looms large for Intuitive people: whatever "is" can be better. They can be fascinated by hypotheses and potentials. They are also often absorbed by their vivid and complex imaginations. The S-N scale measures the most fundamental of the four dimensions of

personality. It's the first cut, so to speak, in evaluating one's type.

However, this delineation doesn't mean that being Intuitive or Sensory is an either/or proposition. Intuitive individuals certainly turn outward at times and pay attention to the world at large; they're just far more inclined to become preoccupied with their own ideas. So, too, Sensory people do sometimes look inward to ponder and to dream. However, for the most part their flights of imagination lag well behind their real-world observations. Neither type can occupy both worlds at once, and each will usually show a clear preference for one over the other.

T/F Scale

The Thinking/Feeling (T-F) scale assesses how people govern themselves and make decisions. Everyone has both thoughts and feelings. However, those who score high on Thinking tend to use their heads more when making choices, while those scoring high on Feeling tend to follow their hearts.

People falling on the Thinking end of the scale tend to be more comfortable basing their actions on impersonal, objective factors. Thinking people can be critical and exacting, both with themselves and others. They're often convinced only by hard data and sound reasoning. Individuals who score highly in

Thinking tend to be frank and straightforward. They are the kind of people who are usually willing to speak their minds and stick to their guns, even if it causes conflict with others. They're known for being tough-minded in their decisions, preferring to keep emotions and desires out of the process as much as possible. Thinking types do have powerful feelings, but a strong show of emotion can embarrass them. As a result, they'll usually keep their feelings in check rather than appearing to lose self-control, even at the risk of seeming hard-nosed or cold.

In contrast, people on the Feeling end of the scale are typically more comfortable basing their actions on personal, emotional factors. When considering their course, this type will consult their feelings first and will almost always show concern for others. For the most part, these individuals are sympathetic and sentimental. As a result, they can often be swayed by powerful desire or a touching appeal. Feeling people tend to be softhearted when making decisions. They don't like to hurt anyone's feelings. It's not that Feeling individuals necessarily have more or deeper emotions than those on the Thinking end of the scale. They simply let their feelings show more easily. This tendency makes them seem warmer and friendlier, which in turn can give them an easier time getting along with others.

J/P Scale

The Judgment/Perception (J-P) scale measures how people process information and arrange their lives. Those who score high on Judgment tend to make up their mind quickly and commit to schedules, while those scoring high on Perception prefer to keep their options open and their timetables flexible.

People strong in Judgment waste no time forming opinions or drawing conclusions. They often report feeling a sense of urgency until a decision is made and can rest only after everything is settled. Closure and finality are important to these individuals, as is orderly procedure. As a result, they can be quick to make

schedules, agendas, or timetables for themselves and others to follow. People strong in Judgment will establish deadlines and take them seriously, expecting others will do the same. They're usually comfortable with routines and can be willing to do all sorts of maintenance and cleaning up after a task, feeling that these are necessary steps for a job's completion. For this type, neatness counts. They usually feel unhappy or unsettled when their personal space is a mess. Straightening things up is often near the top of their to-do list.

For their part, people given to Perception keep their eyes open to what's around them, gathering information and looking for opportunities and alternatives that might be available. They usually feel no hurry to nail things down or settle on a finished product. Instead, they tend to prefer exploring possibilities. These individuals are often playful and spontaneous in action. Schedules can make them feel hurried and over-controlled; they tend to look upon deadlines as mere reminders to get on with the job. Also, people high in Perception prefer their work to be enjoyable and meaningful. If a task of routine maintenance or clean up fails to them, they may balk at doing it or leave it to someone else. Easy-going, even somewhat impulsive, these people are usually quite tolerant of mess. Their personal spaces are often cluttered with an assortment of things they've picked up, used, then dropped and forgotten about.

Frequently Asked Questions

What Is Temperament?

There are two sides to personality: temperament and character. Temperament is a set of inclinations we are born with, while character is a set of habits we acquire as we grow and mature. Temperament is predisposition, hardwired in from birth; character is disposition, developed over a lifetime. Thus, those of the Artisan temperament are predisposed to impulsive action, those of the Guardian temperament to responsible service, those of the Idealist temperament to personal development, and those of the Rational temperament to objective analysis. Each type of person, unless blocked or deflected by an unfavorable environment, will develop the habits of character appropriate to his or her temperament.

Put another way, our brain is a sort of computer that has temperament for its hardware and character for its software. Our hardware is the physical base of our personality, placing on each of us an unmistakable temperament signature, some facets of which can be observed from a very early age. Our software, on the other hand, is made up of our individual experiences and social environment -- the forces around us that, with time and occasion, give shape to our individual character.

Thus temperament is the inborn form of human nature and character is the emergent form that develops through the interaction of temperament and environment. Personality, your unique personal style, is a combination of the two.

How Can the Temperament Sorter Help Me?

Fundamentally, the Temperament Sorter helps you to do two things: understand your own temperament and gain insight to other peoples.' Possessing this valuable knowledge of human nature can have a variety of far-reaching effects on your life.

In the work world, being savvy about your temperament can lead you to a clearer understanding of your natural role and functions within an organization. It can also help you better capitalize on your personal strengths to build your success. By comprehending your co-workers' temperaments and how each temperament relates, you can begin to master your interactions with supervisors and staff. In addition, being able to interpret others' innate styles can help you to meet their implicit expectations, as well as increase your own leadership abilities.

In your personal life, being knowledgeable about temperament can help you build strong, lasting ties with others. This is true because it aids you in anticipating your loved ones' needs and respecting their different ways of dealing with life. When you are responsive to others, you will naturally be looked upon as dependable, responsible, helpful, and empathetic. These are all wonderful qualities to bring to your personal relationships. In addition, coming to terms with your own temperament and innate tendencies can bring new levels of wisdom and self-knowledge to all of your interactions, as well as identify how your particular temperament impacts and influences others.
