What is your:

Mother tongue:

Telugu

Do you know any other languages?

English, Hindi, Kannada, Tamil

Favourite Food(s):

Indian, Thai

Favourite sport(s):

Tennis, Soccer

Favourite TV show(s):

Game of Thrones, Downton Abbey

Favourite Film(s):

Thrillers

Favourite Music:

Anything soothing

Favourite Colour:

Blue

Favourite animal(s):

Lion

Do you have any pets?

If yes, which pets do you have?

Not at the moment

Favourite Holiday Destination(s):

United States of America

Favourite Cities:

New York City, Los Angeles, ████████

Do you have tattoos?

If yes, mention what, where and since when.

Yes, on my neck. Have it since March 2017

Do you have any body piercings?

If yes, mention where and since when.

Yes, my ear lobes since August 2002

Are you left handed, right handed, or ambidextrous?

Right handed leaning towards ambidextrous.

What are your strengths?

A balanced mind with great analytical skills I take pride in approaching life practically and positively. I can talk to people about various topics which helps me connect with them. Being an avid traveller I am exposed to various cultures and attitudes. At work, I am an astute consultant able to connect and manage people from various cultures, my work also helps me understand economics and financials which gives me great insight on solutions that can help humanity.

What are your weaknesses?

I am family oriented and I tend to be partial towards them. I also feel I am quite critical about myself but that helps me achieve perfection. 😊

What motivates you?

Creativity motivates me, I am happiest when I can create new things. I also believe in crunching more in less time, this makes me ambitious and achieve more and build on top of it.

Would you say that you are athletic? How so?

Yes, I am athletic. I have quite a few marathons and half marathons under my belt, I am also very enthusiastic about fitness. I am a avid hiker and have hiked the presidential range (USA) and Himalayas(China).

Would you say you are more practical or book-smart?

I am very practical and believe in constantly building myself to achieve my goals.

Are you creative? If so, how do you express this?

I am extremely creative, I love art and have a good collection of artworks. I also design houses, interiors and clothes. I am also an actor, director and writer, I have created a few short movies and am currently working on authoring a few books. I am also a blogger and work on strategies for vlogs and online classes.

Describe yourself in 5 words?

Smart, Sauve, Stylish, Eternal Believer.

Are you more: *(Please select one of the two options for each attribute)*

Optimistic

Pessimistic

Assertive

Passive

Leader

Follower

Introverted

Extroverted

Quiet

Expressive

Doer

Thinker

Rate your intelligence from Howard Gardner's Multiple Intelligence Assessment: - mark 1 as most and 9 as least of your intelligence *(follow guidance notes below)*:

Intelligence Category	Score (1-most, 9-least)
Naturalist (Understanding living things and reading nature)	1
Musical (Discerning sounds, their pitch, tone, rhythm, and timbre)	3
Logical-Mathematical (Quantifying things, making hypotheses and proving them)	1
Existential (Tackling the questions, of why we live, and why we die)	1
Interpersonal (Sensing people's feelings and motives)	1
Bodily-Kinaesthetic (Coordinating your mind and your body)	1
Linguistic (Finding the right words to express what you mean)	2
Intra-Personal (Understanding yourself, what you feel and what you want)	2
Spatial (Visualizing the world in 3D)	1

Naturalist Intelligence: Naturalist intelligence designates the human ability to discriminate among living things (plants, animals) as well as sensitivity to other features of the natural world (clouds, rock configurations). This ability was clearly of value in our evolutionary past as hunters, gatherers, and farmers; it continues to be central in such roles as botanist or chef. It is also speculated that much of our consumer society exploits the naturalist intelligences, which can be mobilized in the discrimination among cars, sneakers, kinds of makeup, and the like.

Musical Intelligence: Musical intelligence is the capacity to discern pitch, rhythm, timbre, and tone. This intelligence enables us to recognize, create, reproduce, and reflect on music, as demonstrated by composers, conductors, musicians, vocalist, and sensitive listeners. Interestingly, there is often an affective connection between music and the emotions; and mathematical and musical intelligences may share common thinking processes.

Logical-Mathematical Intelligence: Logical-mathematical intelligence is the ability to calculate, quantify, consider propositions and hypotheses, and carry out complete mathematical operations. It enables us to perceive relationships and connections and to use abstract, symbolic thought; sequential reasoning skills; and inductive and deductive thinking patterns.

Existential Intelligence: Sensitivity and capacity to tackle deep questions about human existence, such as the meaning of life, why we die, and how did we get here.

Interpersonal Intelligence: Interpersonal intelligence is the ability to understand and interact effectively with others. It involves effective verbal and nonverbal communication, the ability to note distinctions among others, sensitivity to the moods and temperaments of others, and the ability to entertain multiple perspectives. Teachers, social workers, actors, and politicians all exhibit interpersonal intelligence. Young adults with this kind of intelligence are leaders among their peers, are good at communicating, and seem to understand others' feelings and motives.

Bodily-Kinaesthetic Intelligence: Bodily kinaesthetic intelligence is the capacity to manipulate objects and use a variety of physical skills. This intelligence also involves a sense of timing and the perfection of skills through mind-body union. Athletes, dancers, surgeons, and crafts people exhibit well-developed bodily kinaesthetic intelligence.

Linguistic Intelligence: Linguistic intelligence is the ability to think in words and to use language to express and appreciate complex meanings. Linguistic intelligence allows us to understand the order and meaning of words and to apply meta-linguistic skills to reflect on our use of language. Linguistic intelligence is the most widely shared human competence and is evident in poets, novelists, journalists, and effective public speakers. Young adults with this kind of intelligence enjoy writing, reading, telling stories or doing crossword puzzles.

Intra-personal Intelligence: Intra-personal intelligence is the capacity to understand oneself and one's thoughts and feelings, and to use such knowledge in planning and derationing one's life. Intra-personal intelligence involves not only an appreciation of the self, but also of the human condition. It is evident in psychologist, spiritual leaders, and philosophers. These young adults may be shy. They are very aware of their own feelings and are self-motivated.

Spatial Intelligence: Spatial intelligence is the ability to think in three dimensions. Core capacities include mental imagery, spatial reasoning, image manipulation, graphic and artistic skills, and an active imagination. Sailors, pilots, sculptors, painters, and architects all exhibit spatial intelligence. Young adults with this kind of intelligence may be fascinated with mazes or jigsaw puzzles, or spend free time drawing or daydreaming.

It is never easy to let go of precious things, especially when there are many uncertainties involved. But anything beautiful can be created only when you take risks. It is with these thoughts and an undying faith in the universe that I embarked on this unusual path of sperm donation.

I'm sure your purpose of reading this is to know more about your roots and about me. so here it goes

1. Physically I stand 5 feet 10 inches with an athletic body, jet black hair, beautiful brown eyes, large shoulders and a trim waist. I have light brown skin and it behaves like butter (tans and scars when it is exposed to harsh elements).
2. Mentally I am an eternal believer, very determined, practical and independent. I see things with a different perspective and help people achieve their goals.
3. Spiritually I am a tantric adept. I dabble in mysticism and deal with sciences that are unknown to a common man. Spirituality has been running in my family for generations.
4. Physiologically I do not come across as a talkative person, but yet I dabble in philosophy and the science of life.
5. At this point of my life my achievements are substantial. I am an ace analyst & manager at work, I am also a therapist who uses his mysticism. I am working on authoring several books and developing online programs. I am a blogger, actor and a director of short movies.
6. I like nature, I like to hike and exercise. I'm not a foodie but I like to cook and feed others. I've helped develop a few vlogs on cooking. I also advise people on marketing strategies, I design art, interiors and envision practical buildings.
7. I come from a very powerful family but, yet I had a very hard childhood. I grew up with my mother and grandfather which made me steadfast and someone who believes in being independent. There were innumerable challenges and many dependents as I grew up, I have faced all my fears and stood up to life. I am proud to say that my achievements are all my own based purely on my abilities.
8. I am an avid traveller and have experienced many countries. With the abilities to explore my past lives, I have explored remote places that let me settle my explorative mind and piqued interests with a personal touch.

Goodwill Message

Donor # 1655

This message will find you all grown up and brimming with dreams, I hope your life till now has been extraordinary and exceeded the expectations you had from life.

This letter is a time capsule and I'm sure the partners in crime (you & your parents) have had a terrific time. Birthdays, vacations and lots of love is how I envision it. I too am a partner in crime, but I most probably count as a by stander. It is a blessing to have so many people around, specially those courageous parents who go to any length to beget you and then love and support you.

You might have wondered why I decided to donate a part of me to complete strangers. The answer to it lies in my life experiences, me and my wife have been struggling for years to have a baby and I know first hand what a gift a kid can be. It is also a higher privilege to be able to share this gift with others.

I'm sure you are an extraordinary young person and I would like to wish you the best in life. Living a happy and fulfilled life as you work towards your goals is of utmost importance. Since we share a DNA, I also hope you got the best of what I can offer.

Today you are precious cargo, tomorrow you are going to be a bundle of joy and by the time you read this you would be a youthful gem. What you need to know is that diamonds can be cast only when 1000 small cuts are made, so stay determined and persevere until you achieve your dreams.

I want you to know that you were an offering with love and will always be loved no matter where you are. It would bring me utmost happiness if you become a healthy independent forward-thinking individual. Unwavering and balanced, be so steadfast that you become an inspiration to hundreds. Love you loads!

Before I start sounding like an old bore, Chao Chao & Xo Xo. Farewell my friend!
