What is your:

Mother Tongue:

RUSSIAN

Do you know any other languages?

romanian, ukranian, english

Favourite Food(s):

salads, soups

Favourite sport(s):

swimming, running

Favourite TV show(s):

news, comedy club

Favourite Film(s):

fantasy,

Favourite Music:

dance music

Favourite Colour:

green, blue

Favourite animal(s):

dogs, cats

Do you have any pets?

If yes, which pets do you have?

dog

Favourite Holiday Destination(s):

sea coast

Favourite Cities:

London, Moscow

Do you have tattoos?

If yes, mention what, where and since when.

no

Do you have any body piercings?

If yes, mention where and since when.

no

Are you left handed, right handed, or ambidextrous?

right handed

What are your strengths?

Stamina and patience

What are your weaknesses?

What motivates you?

succes

Would you say that you are athletic? How so?

Yes, I am a swimmer,

Would you say you are more practical or book-smart?

practical

Are you creative? If so, how do you express this?

I like to give gifts in the form of surprises.

Describe yourself in 5 words?

Are you more: *(Please select one of the two options for each attribute)*

Optimistic

Pessimistic

Assertive

Passive

Leader

Follower

Introverted

Extroverted

Quiet

Expressive

Doer

Thinker

Rate your intelligence from Howard Gardner's Multiple Intelligence Assessment: - mark 1 as most and 9 as least of your intelligence (*follow guidance notes below*):

Intelligence Category	Score (1-most, 9-least)
Naturalist (Understanding living things and reading nature)	7
Musical (Discerning sounds, their pitch, tone, rhythm, and timbre)	4
Logical-Mathematical (Quantifying things, making hypotheses and proving them)	5
Existential (Tackling the questions, of why we live, and why we die)	4
Interpersonal (Sensing people's feelings and motives)	6
Bodily-Kinaesthetic (Coordinating your mind and your body)	9
Linguistic (Finding the right words to express what you mean)	8
Intra-Personal (Understanding yourself, what you feel and what you want)	8
Spatial (Visualizing the world in 3D)	8

Naturalist Intelligence: Naturalist intelligence designates the human ability to discriminate among living things (plants, animals) as well as sensitivity to other features of the natural world (clouds, rock configurations). This ability was clearly of value in our evolutionary past as hunters, gatherers, and farmers; it continues to be central in such roles as botanist or chef. It is also speculated that much of our consumer society exploits the naturalist intelligences, which can be mobilized in the discrimination among cars, sneakers, kinds of makeup, and the like.

Musical Intelligence: Musical intelligence is the capacity to discern pitch, rhythm, timbre, and tone. This intelligence enables us to recognize, create, reproduce, and reflect on music, as demonstrated by composers, conductors, musicians, vocalist, and sensitive listeners. Interestingly, there is often an affective connection between music and the emotions; and mathematical and musical intelligences may share common thinking processes.

Logical-Mathematical Intelligence: Logical-mathematical intelligence is the ability to calculate, quantify, consider propositions and hypotheses, and carry out complete mathematical operations. It enables us to perceive relationships and connections and to use abstract, symbolic thought; sequential reasoning skills; and inductive and deductive thinking patterns.

Existential Intelligence: Sensitivity and capacity to tackle deep questions about human existence, such as the meaning of life, why we die, and how did we get here.

Interpersonal Intelligence: Interpersonal intelligence is the ability to understand and interact effectively with others. It involves effective verbal and nonverbal communication, the ability to note distinctions among others, sensitivity to the moods and temperaments of others, and the ability to entertain multiple perspectives. Teachers, social workers, actors, and politicians all exhibit interpersonal intelligence. Young adults with this kind of intelligence are leaders among their peers, are good at communicating, and seem to understand others' feelings and motives.

Bodily-Kinaesthetic Intelligence: Bodily kinaesthetic intelligence is the capacity to manipulate objects and use a variety of physical skills. This intelligence also involves a sense of timing and the perfection of skills through mind-body union. Athletes, dancers, surgeons, and crafts people exhibit well-developed bodily kinaesthetic intelligence.

Linguistic Intelligence: Linguistic intelligence is the ability to think in words and to use language to express and appreciate complex meanings. Linguistic intelligence allows us to understand the order and meaning of words and to apply meta-linguistic skills to reflect on our use of language. Linguistic intelligence is the most widely shared human competence and is evident in poets, novelists, journalists, and effective public speakers. Young adults with this kind of intelligence enjoy writing, reading, telling stories or doing crossword puzzles.

Intra-personal Intelligence: Intra-personal intelligence is the capacity to understand oneself and one's thoughts and feelings, and to use such knowledge in planning and derationing one's life. Intra-personal intelligence involves not only an appreciation of the self, but also of the human condition. It is evident in psychologist, spiritual leaders, and philosophers. These young adults may be shy. They are very aware of their own feelings and are self-motivated.

Spatial Intelligence: Spatial intelligence is the ability to think in three dimensions. Core capacities include mental imagery, spatial reasoning, image manipulation, graphic and artistic skills, and an active imagination. Sailors, pilots, sculptors, painters, and architects all exhibit spatial intelligence. Young adults with this kind of intelligence may be fascinated with mazes or jigsaw puzzles, or spend free time drawing or daydreaming.

Pen-Sketch

All my conscious life I have been actively involved in sports. After studying at school, I went to college, where I was educated as an engineer in radio equipment. After college, I went to serve in the army, and a year later I entered the military academy. I served as an officer in the border troops for 13 years. After the army, I started working at school as a teacher of physical education, because I really love children and sports. Also in my free time I really like to walk in nature in parks, in the forest. I love animals and birds very much. Especially dogs. I also like equipment, cars.
