**What is your:**

Mother tongue:

British

Do you know any other languages?

No

Favourite Food(s):

Anything

Favourite sport(s):

Running, Tennis

Favourite TV show(s):

Rupauls Drag Race

Favourite Film(s):

Little Women, A Single Man

Favourite Music:

Techno, Dance, Pop

Favourite Colour:

X

Favourite animal(s):

Dogs

Do you have any pets?

If yes, which pets do you have?

No

Favourite Holiday Destination(s):

Berlin, Copenhagen

Favourite Cities:

London

Do you have tattoos?

If yes, mention what, where and since when.

Yes

Do you have any body piercings?

If yes, mention where and since when.

Yes - ears

Are you left handed, right handed, or ambidextrous?

Right

What are your strengths?

Ambitious, caring, fun

What are your weaknesses?

Worrier

What motivates you?

Relationships, good times, improving

Would you say that you are athletic? How so?

Yes, I am a lot, doing first marathon this year

Would you say you are more practical or book-smart?

Book Smart

Are you creative? If so, how do you express this?

Yes - I don't make things myself, but love art + music

Describe yourself in 5 words?

Thoughtful, loving, fun, understanding, inquisitive

Are you more: *(Please select one of the two options for each attribute)*

Optimistic

Pessimistic

Assertive

Passive

Leader

Follower

Introverted

Extroverted

Quiet

Expressive

Doer

Thinker

Rate your intelligence from Howard Gardner's Multiple Intelligence Assessment: - mark 1 as most and 9 as least of your intelligence (follow guidance notes below):

Intelligence Category	Score (1-most, 9-least)
<b>Naturalist</b> (Understanding living things and reading nature)	5
<b>Musical</b> (Discerning sounds, their pitch, tone, rhythm, and timbre)	3
<b>Logical-Mathematical</b> (Quantifying things, making hypotheses and proving them)	3
<b>Existential</b> (Tackling the questions, of why we live, and why we die)	3
<b>Interpersonal</b> (Sensing people's feelings and motives)	2
<b>Bodily-Kinaesthetic</b> (Coordinating your mind and your body)	2
<b>Linguistic</b> (Finding the right words to express what you mean)	3
<b>Intra-Personal</b> (Understanding yourself, what you feel and what you want)	4
<b>Spatial</b> (Visualizing the world in 3D)	5

**Naturalist Intelligence:** Naturalist intelligence designates the human ability to discriminate among living things (plants, animals) as well as sensitivity to other features of the natural world (clouds, rock configurations). This ability was clearly of value in our evolutionary past as hunters, gatherers, and farmers; it continues to be central in such roles as botanist or chef. It is also speculated that much of our consumer society exploits the naturalist intelligences, which can be mobilized in the discrimination among cars, sneakers, kinds of makeup, and the like.

**Musical Intelligence:** Musical intelligence is the capacity to discern pitch, rhythm, timbre, and tone. This intelligence enables us to recognize, create, reproduce, and reflect on music, as demonstrated by composers, conductors, musicians, vocalist, and sensitive listeners. Interestingly, there is often an affective connection between music and the emotions; and mathematical and musical intelligences may share common thinking processes.

**Logical-Mathematical Intelligence:** Logical-mathematical intelligence is the ability to calculate, quantify, consider propositions and hypotheses, and carry out complete mathematical operations. It enables us to perceive relationships and connections and to use abstract, symbolic thought; sequential reasoning skills; and inductive and deductive thinking patterns.

**Existential Intelligence:** Sensitivity and capacity to tackle deep questions about human existence, such as the meaning of life, why we die, and how did we get here.

**Interpersonal Intelligence:** Interpersonal intelligence is the ability to understand and interact effectively with others. It involves effective verbal and nonverbal communication, the ability to note distinctions among others, sensitivity to the moods and temperaments of others, and the ability to entertain multiple perspectives. Teachers, social workers, actors, and politicians all exhibit interpersonal intelligence. Young adults with this kind of intelligence are leaders among their peers, are good at communicating, and seem to understand others' feelings and motives.

**Bodily-Kinaesthetic Intelligence:** Bodily kinaesthetic intelligence is the capacity to manipulate objects and use a variety of physical skills. This intelligence also involves a sense of timing and the perfection of skills through mind-body union. Athletes, dancers, surgeons, and crafts people exhibit well-developed bodily kinaesthetic intelligence.

**Linguistic Intelligence:** Linguistic intelligence is the ability to think in words and to use language to express and appreciate complex meanings. Linguistic intelligence allows us to understand the order and meaning of words and to apply meta-linguistic skills to reflect on our use of language. Linguistic intelligence is the most widely shared human competence and is evident in poets, novelists, journalists, and effective public speakers. Young adults with this kind of intelligence enjoy writing, reading, telling stories or doing crossword puzzles.

**Intra-personal Intelligence:** Intra-personal intelligence is the capacity to understand oneself and one's thoughts and feelings, and to use such knowledge in planning and derationing one's life. Intra-personal intelligence involves not only an appreciation of the self, but also of the human condition. It is evident in psychologist, spiritual leaders, and philosophers. These young adults may be shy. They are very aware of their own feelings and are self-motivated.

**Spatial Intelligence:** Spatial intelligence is the ability to think in three dimensions. Core capacities include mental imagery, spatial reasoning, image manipulation, graphic and artistic skills, and an active imagination. Sailors, pilots, sculptors, painters, and architects all exhibit spatial intelligence. Young adults with this kind of intelligence may be fascinated with mazes or jigsaw puzzles, or spend free time drawing or daydreaming.

Donor - Hayfever (14)

Sister - Prawns & Shellfish Allergy (18), Asthma (10)

Donor Number: 1581

Hello,

You will have just turned 16, so congratulations on that,  
I hope you're celebrating.

I sincerely hope you have had a fantastic, loving,  
and full life to this point, and the knowledge of  
span donation being a part of your life has been  
learnt with lots of support + love from your  
family. All the best - 

I like to think I am a very caring & loving person - and I think my friends & family would agree. Friends are very important to me. I currently live with 3 friends I've known since childhood, and we have a fantastic close circle of friends outside of my home as well.

I'm a pretty easy going person, I like to have fun, eat, drink, dance, party & do things I enjoy. Music is very important to me, I often visit festivals & other countries to which music I love.

Work is very important to me as well, I work in marketing in the restaurant sector - which I love. I'm very into food & wine, and love cooking and eating out.

~~I like to think I'm pretty quite handsome~~

My most distinctive feature is probs my dark eyes or hair, I'm pretty skinny because I run a lot.
