Life is very simple and clear until we make it complicated or complex. Enjoy the life to the core, never ever restrict nor allow anyone to influence to restrict. The reason I decided to donate was so that other families can benefit, and start a family. I'm sure that you have parents that love you very much. I believe our family blood line has good genes, I have never been seriously sick or needed medical treatment. I am quite different and an expert in creating problems and finding the solution out of all. I overthink to find the best out of all.

If one day you would like to contact me I have no problem doing so, we can meet and talk, have a coffee or a lunch together, I'm sure that will be very nice for all - I am a normal down to earth guy.

I hope that you have a great life and lots of experiences and look forward to hearing your story someday. I am always available, if you wish to get in contact, I'm sure I will enjoy meeting you. If the world was full of people like us, the world would be a better place.
